W. B. Kilgore, president of the
American Cotton Exchange, and T.
H. Caraway (D.) Senator, from H. Caraway (D.), Senator from

The statement refterates the de-mand for government aid in han-dling the exportable crop surpluses, much after the manner proposed at the last session of Congress.

Greater Farm-Ald Support The temper of the visitors, as by the statements applauded and by the statements applicated and by the reports of men from the South, indicated a much more uni-versal support of such legislation at the coming session of Congress than at the recent session when four more supporting votes in the Senate would have changed the result there, while a score in the House switched from "No" to "Yes" on the McNary-Haugen bill would have altered the outcome

There was little discussion at the conference of the situation in the grain belt. The speakers dwelt on cotton and the difficulties the grow-ers face as the result of two large crops in succession. Reports from the South were that farmers there were slow to turn over to the financ-

basis for the discussion. The tend-ency to hold a less bitter attitude toward those opposed to farm relief legislation along the lines desired up of the nation. But it would be

References to the obliteration of party lines and the bursting of bonds of tradition and partisanship in the interest of agriculture, were applauded. Both the Administration and the minority party in Congress were criticized for their failure to place agriculture on an equality with

other business.

HOT SPRINGS, Ark., Nov. 17 (Special)—Education and organization, rather than relief legislation will be found the permanent solution of the problems confronting the farmers of the nation, was the keynote sounded at opening sessions of the twenty-second annual convention of the Farmers' Educational and Cooperative Union of America.

This solution was voiced by John E. Martineau, Governor-elect of Arkansas, by W. C. Lansdon of Wash-ington, D. C., member of the Federal Board of Tax Review, H. G. Keeney of Omaha, Neb., member of the board of directors of the union, and by Dr. George L. Sands, president of the Arkansas State Farmers' Union.

Judge Martineau declared that in his opinion the people of the country were turning too much to the Government for relief in farm problems. He advised the farmers to conand better schools and urged diversity of crops. With improvement of farm living conditions, the farm would be made more attractive to the better educated boy and girl, he

# Grangers Unite in Demand for Export Debenture Law

For First Time Eastern Farmers Join Those of West in Support of Movement

corn belt.

By a Staff Correspondent PORTLAND, Me., Nov. 17-The National Grange will put all of its re-sources behind a drive in Congress for an export debenture law effective with the 1917 crop as the result of ARE REPRESENTED the vote of the sixtleth annual convention of the organization. With 26 states supporting the project and only one state master opposing it, the Grange will for the first time be ar-rayed definitely behind such a request for farm relief.

In the last session of Congress the Grange declined to indorse the Mc-Nary-Haugen bill and therefore was Farm organization delegates and leaders from the grain and cotton states, meeting here in a joint conference to perfect and announce a national policy for agriculture, have outlined a program designed to unite vention.

mon agricultural relief legislation, along the lines of the McNary-laughen Bill.

The declaration of policy was formulated at a closed meeting last night, attended by most of the 300 men who listened yesterday to addresses by William Hirth of Columbia.

Mo temporary chairman: Dr. Tait

### CHINA CALLED USTICE TEST BY MR. BORAH beginning with the 1927 crop. A resolution has been introduced which charges that American steamships opened bars and sold liquor outside the 12-mile limit. The resolution provides for a thorough investigation by the National Grange exceptive committee and the presents. JUSTICE TEST

Senator Claims Chinese Must Be Treated as a Nation on Equal Terms

WASHINGTON, Nov. 17 (A)-The turmoil in China will furnish an acid test for the world peace program, William E. Borah, chairman of the Senate Foreign Relations Committee, declared in an address before the National Council of Jewish Women.

The real trouble in China, he said is nationalism coming in the presence of imperialism, and if a policy of force is adopted by any nation at-tempting intervention there that na-tion will become the deliberate as-sassin of justice in the Orient for decades to come.
"We must deal with them, in so far

"We must deal with them, in so far as we deal with them as a nation," he added, "upon terms of equality, in absolute justice to their own rights and to their own right to live their own lives and to possess and enjoy what, in all justice is theirs as a people."

"China may furnish the acid test of whether the world has been converted to justice as a basis of international relations or whether it proposes to retain the barbarous creed."

"The present rates debar the farmer from shipping his small products to the near-by consumer at anything like a proper profit, the delegates assert. They say that with a smaller rate a city dweller would be able to order a shipment of eight or 10 pounds twice a week, including eggs, and during the short season, such vegetables as radishes, sweet corn.

were slow to turn over to the financing corporations now in process of being formed, the cotton these concerns must have if 4,000,000 balos are to be retired from the market as proposed. The capital stocks of the proposed corporations have not been obtained in all cases.

There seemed to be little difference of opinion among the delegates even when a discussion of the national policy was reached. A draft made by the committee on arrangements, in session here two days preceding the conference, furnished the basis for the discussion. The tend-

dangerous to assume that these things may not be molded into one concerted national force through the

dominating spirit of nationalism "With fair and just treatment, and with a policy on the part of foreign nations to help instead of exploitation, China can take her place among the strong and prosperous nations. She will soon adjust her internal problems and she has the man power, wealth and territory.

Y., Nov. 17 DEFEAT or amendment of the Rivers and Harbors Bill which is to come before the Senate next month, will be urged by the American members of the Great Lakes Harbor Association of the United States and Canada. The present diversion of water through the drainage canal is under permit from the Secretary of War. but if the Rivers and Harbors Bill is passed as it stands, it is claimed, the diversion of 3600 feet a second at Chicago, will be more difficult to overcome than at present, and the issue now before the Supreme Court will be practically

### MOTOR FINANCE ETHICS PLACED ON HIGH PLANE

General "Tightening Up" of Installment Buying Rules Sought at Convention

Special from Monitor Bureau CHICAGO, Nov. 17-Definition of good and bad practices in the enornous installment trade in automo biles was undertaken by the youth-ful National Association of Finance Companies at its third meeting, de-voted to automobile financing. Action taken is designed to build up a code

of ethics and uniform standards. It was resolved that all advertis-ing be discontinued which emphases specific terms and financing rates in the sale of automobiles. Advertising of definite prices by manufacturers on which cars can be bought was objected to on the ground that in various parts of the country conditions are different and hence selling rates all right in one section do not prevail in others, such general advertising therefore leading to confusion.

No Opposition In certain localities, it is said, fo instance, theft and fire insurance are others, and this leads to differences in the cost of carrying the paper. To the surprise of some delegates there was no opposition, the representative of one important manufacturer reporting this type of advertising had been discontinued by his company.

service station any required lephace and fraudulent financing, a central filing bureau of cards containing serial and motor numbers was recommended for national service. Greanizations in New York and in Chicago new perform such service in their districts. It was also recommended that names of "poor credit risks" be revealed to a central bureau, without disclosing the names of the companies that reported them; and that names of persons who have resisted collection of just claims be supplied. A committee was authorised to prepare a standard form for interchange of credit information.

Palmer, partor of the ancient University of Viino, Polaric, urged students to welcome international problems as opportunities for co-operation. "International friendships," he said, "are promoted by solving problems as we meet them."

# ENGINEERS SEEK Smokeless American Cities and Liquid Coal Predicted

Revolutionary Changes in Use of Coal Indicated by Chemists of the World

made smokeleses, internal combustion engines running on pulverized coal and other seemingly "magic achievements" were envisaged as now within the grasp of modern chemists by speakers at the International Conference on Bituminous Coal at the

Walter E. Trent of New York, speaking on some new uses of pul-verized coal before the power section declared that coal could be ma to have the mobility of a liquid by the mere application of heat to it in its pulverized form.

"The most useful and valuable of all the characteristics of coal is the last to be taken advantage of, and other engineers gathered for this offers to solve in all respects an convention are likewise laying special emphasis upon the need of imcarbonizing coal," he said. "Pul
Dr. R. Lessing, of London, an engenerated (either chemical water or hydrocarbon) gives to the coal a state of great mobility. In this condition it resembles liquids and answers the common laws of liquids.

Revolutionary Changes "The coal particles become enlivened by the vapors issuing there-from. These vapors form bubbles, or casings, around each and every par-ticle, and reduce friction to such a degree that the angle of repose of

"As long as vapors, or gases, are issuing from the particles, the coal retains its liquid-like condition. Its range is from the low temperatures at which distillation first commences, right through to the highes heating must be gradual.

"When it becomes possible to treat coal as a liquid instead of a solid, the coal industry and all coal tech nique must undergo a change. The mining of coal, its transportation, its burning, its carbonization and its gasification will be affected. It looks as though a big industry has to be done all over again."

The same speaker declared that carbonized coal dust offered a solution to the problem of making Amer ican cities smokeless. It is a perfec fuel, he declared, for all central power plants and all steam-raising plants and furnaces. Carbonized

engines as liquid fued. At similar working pressures the constant presure cycle will deliver a higher attainable thermal efficiency than ither the Otto or the Diesel cycles."

On Gasoline Substitutes Coal as power, its chemical valuthe central topics in the three meet-ings of the day's conference. Outstanding in the morning session, at which two engineers from Paris and one from London spoke, was the paper by Paul Dumanois, chief of the French Air Service, on a substitute for gasoline, which, he said, was successfully demonstrated in France recently, both in automobiles and

airplanes.

This substitute is a mixture of methyl alcohol, he said, commonly known as wood alcohol, and products derived from coal. It was used in an

derived from coal. It was used in an automobile that ordinarily consumed 10 gallons every 62 miles, being a 1921 model of 10-horsepower. 1
"There were consumed with the methyl alcohol 12 gallons of fuel, and the speed, maintained almost constantly above 43 miles an hour, could have been carried beyond 55 miles an hour. Under these condimiles an hour. Under these condi-tions, the saving in calories in comparison with gasoline amounts to 15 per cent," Mr. Dumanois said.

"During this test, moreover, the temperature of the water in the radiator was considerably lower than an atmospheric temperature about

### EDISON STOCK INCREASE PLEA IS UNOPPOSED

Public Utilities Board, How ever, Takes It Under Advisement

A request by the Edison Electric lituminating Company of Boston for and all interested and municipal permission to issue new capital civic and commercial organizations stock to the amount of more than \$17,750,000 was taken under advisement by the State Commission on Public Utilities today after a short hearing.

Although no opposition to the issue developed, Henry C. Attwill, chairman of the commission asked Joseph P. Lyons, counsel representing Boston, if he had any suggestions Mr. Lyons expressed the opinion

that it is the duty of the utilities de-

company have been marketed at \$130 trade board of the Boston Chamber in 1921, \$150 in 1922, \$140 in 1923, and \$155 in 1924, when the largest previus issue, one of \$12,000,000, was

Proceeds of the issue are to be used to retire floating indebtedness of the company and to pay for im-provements of its plant. Additions to by Mr. Ives. He asserted that from the book value of the company's plant in comparison with its out-standing capital stock and premium, it could reasonably claim the right to issue \$37,000,000 worth of stock more than it is asking to issue.

Standing of Company The statement by Mr. Ives was in

part as follows:
"As of Aug. 31, 1926, the plant account stands on the books of the com-pany at \$117,829,924. This sum includes \$8,420,318 which had been expended on Aug. 31, 1926, on account of new construction unfinished on that date.

"In addition to the \$117,829,924 actually on the books for plant expand on Kingston Street would cause penditures up to Aug. 31, 1926, it will new difficulties for trucks and comcost the company a gross amount of \$13,815,561 to complete construction now in process which was unfinished points north to Albany Street and "Against this cost it is estimated

that replacements amount to \$1,480,-850, making the net cost of additions te plant in process \$12,334,701. Adding the \$12,334,701 to the \$117,829,-164,625. The capital and premium account stands at \$75,628,734. Deducting the capital and premium from \$130,164,625, leaves \$54,535,891, which is the excess of plant expenditure and commitments for plant expenditures over the proceeds of capi

"At this time we are asking permission to capitalize \$17,731,510 of this amount. The margin between what we do ask and what we might ask is \$37,000,000.

Some Items Questioned "Although the company cont

that practically all of this \$54,525,391 might fairly be capitalized, some questions have been raised regarding the propriety of every item. For instance, that part of the total rep-

### BOSTON TRAFFIC ROUTE REVISION PLANS DEBATED

Reversal for Washington and Devonshire Streets Opposed at Hearing

AGREEMENT SOUGHT AMONG ALL FACTORS

Mayor's Committee, Street, Trade, and Plan Boards Would Revise System

The solution to Boston's intricate street traffic problem must be one which the Mayor's projected advisory traffic committee will devise in conjunction with the Board of Street Commissioners, the retail Trade Board of the Boston Chamber of Commerce, the Boston City Planning Board and the Boston Police Depart-

ment.

This was agreed upon today at the conclusion of the public hearing in City Hall Annex when the proposed change of vehicular flow in Washington Street from northbound to southbound and in Devonshire from southbound to northbound, was underconsideration

consideration. William Stanley Parker, who drew up the plan providing for the changed direction of traffic in Washington and Devonshire Streets, coupled with reversal of direction in intersecting traffic between these thoroughfares, explained the preposal for the gen-eral revision as advocated by the planning board.

At the close of the hearing, Mr. Parker agreed with Thomas F. Goode, deputy superintendent of police, and directly in charge of traffic, that deliberate and careful study must be given all of the traffic relief measures now before the stree commissioners by the Mayor's Advisory Committee, pefore any final action is taken.

Daniel Bleomfield, for the retail trade board of the Boston Chamber of Commerce, opposed in general Mr. Packer's scheme, which has the indorsement of the planning board, as one which would give rise to even more traffic problems and spots of congestion than those existing to-

lay.
Alton E. Briggs of the Boston Fruit & Produce Exchange opposed any change in traffic direction which would affect Dock Square.

Thomas E. Lockney of the Jordan

Marsh Company said that, speaking for his concern, the present traffic regulations generally are considered satisfactory, and that no further changes should be contemplated at this time unless they be those of minor importance.

Reversing Traffic Opposed

Strong opposition to the plan for reversing traffic on Washington and other streets was voiced for the merchants of Boston by Daniel Bloomfield, manager of the retail board feels that the report of the City Planning Board, with its prosed changes, will not bring the rellef expected.

Such changes in the flow of traffic Coal as power, its chemical value the plant which are now under way on Washington, Devonshire and and the use of coal by products, were will aggregate a cost of more han other streets between Bromfield and \$12,000,000, according to financial in-formation set forth in a statement add to the congestion in this area and cause complications which will become a burden on the public and He cited four specific objections, as follows:

First-The reversal of the flow of raffic on Washington Street and on trucks on Washington Street, and large number of pedestrians who now use this street.

Second-It would seriously inconvenience the public and business by making it necessary to travel many more blocks than at present, in order to get from one point to another.

Third—The reversal on Devonshire

the B. & A. terminals.

Fourth—The number of left-hand turns would be increased consider-

Constructive plans for relief of congestion and for improved methods of expediting traffic, are always wel-tomed by the retail trade board, he

Mr. Bloomfield Cites Examples Some of the many examples cited by Mr. Bloomfield in support of his opposition to the plan, follow:

A shopper stops at Filene's on Summer Street, transacts her busi-ness and then wants to do some business on Bromfield Street. Now, she has but two blocks to travel. Under the new plan she must travel four or five blocks, via Temple Place, or seven blocks via Hawley, Devonshire, School and Tremont

Streets.

A truck has a delivery to make at R. H. White Company, on Bedford Street and then a call on Bromfield Street. Now it travels only three blocks via Washington Street. The

instance, that part of the total represented by expenditures prior to June 30, 1921, contains the items which in the rate case Mr. Mildram (representing the city of Boston) questioned. These items amounted to \$6,747,573.

"That part of the total represented by expenditures for completed and uncompleted plant since 1921 includes expenditures for steam heating and radiocasting and certain other expenditures which Mr. Lester (representing the department) be-

It was agreed that in used ear transactions the amount paid the dealer "should not exceed Blue Book appraised value or the value set by some other recognized published standard." The practice of some finance companies of giving automo-Chamber of Commerce. After the bile dealers rebates in one form or luncheon the delegates will follow another is unfair competition, it was declared.

the fife and drum corps up Asylum The installment plan is not dangerously mortgaging the future of the country, declared Milan V. Ayres of Chicago, who recently made a survey of installment business for the American Bankers Association

The annual sale of goods, exclusive of real estate, stocks and bonds on the installment plan in this country amounts to \$6,179,000,000 On this total, the average outstanding debt is \$2,638,000,000, or 47 per

cent of the sales, Mr. Ayres said.
The largest installment business is done in automobiles, 76 per cent of all cars being sold on the installment plan. Eighty per cent of trucks are thus sold. The average first payment is one-third of the purchase price and the time to pay out 12 months. The average carrying charge is 10 per cent of the deferred pay-

According to the National Automobile, Chamber of Commerce, the average retail cash price of pas-senger cars is \$866 and of trucks

The average down payment on used cars was estimated at 40 per cent, while the average carrying charge is 15 per cent. Total sales of used cars on the installment plan amounted to \$961,000,000 and the outstanding debt on such cars \$329,-000,000. The outstanding debt for cars, both new and used, was given as \$1,378,000,000.

National Income \$70,000,000,000 income estimated \* \$70,000,000,000, Mr. Ayres said. Even in the most sedents of the federations of women's clubs of the six states who have vere depressions only a very small percentage of the people are without been invited to be guests of honor at the conference. Many of the women income, he declared. Those who buy on the installment plan, he added, others the two days will be free for owe at one time less than 4 per cent of our income on short installment The big event will take place on Thursday evening, when the entire assemblage will be the guests of Gov. John H. Trumbull at a compli-

## ORD D'ABERNON did not remain moderate and all the profits thus acquired were destroyed when the crash came." While Lord D'Abernon 'did not mention France it is belleved in LORD D'ABERNON

By Wireless from Monitor Bureau LONDON, Nov. 17-Certain views regarding currency questions generally held by economists may undergo considerable revision when the entire history of German currency from the period of depreciation to the present stabilized conditions are studied, according to Viscount D'Ab-ernon, the ex-British Ambassador in Berlin, addressing the Royal Statis-tical Society here.
"One of the most dangerous here-

sies regarding foreign exchange is the supposition that it is funda-mentally dependent upon the bal-ance of trade," said Lord D'Aberne a. This, he said, "has been responsible for much which is erroneous.... The prevalence of the belief in this theory has probably retarded stabilization for nearly two years. This theory has been based upon the confusion between the influences which effect the wave movement on the surface with the more powerful forces governing the tidal action below. The surface may be ruffled the tide flows on.

Enthusiasm for Saving Lord D'Abernon mentioned Germany's present enthusiasm for saving and explained the situations as situation arises that through the follows: "One of the most interest-ing facts regarding German inflation is that while the state practically de-faulted upon its public debt, and while the total loss to creditors, public and private was not less than £10,000,000,000,000, the effects have not been to diminish the saving habit. From all parts of Germany it is now reported, the desire to put money in the savings banks and other institutions is wider than before the war. The fear that a debtor may not ob-

points.
"It is worthy of notice," he said, rency was not based upon gold.

There was no gold to base it upon, and no foreign country was at the country

tice in the fact that those classes owners modernize their mines. For which in the end suffered the most in their present condition, it is said

alimina administra

concluding remarks. "Stabilization," he said, "requires the strict limitation of currency amount and a formal proclamation of the limitation of such nature as to inspire belief. The German example suggests that it is also necessary to adopt, first, a definitely fixed and unalterable example suggests that the proclamation of the limitation of such nature as to inspire belief. change level maintained by the na-tional bank and other institutions, adequate funds and an adequate purpose, and, second, a new currency replacing the old discredited currency, public confidence being more easily accorded to a new issue than a restored one, and, third, an imaginative element stimulating public confidence in a new issue.'

### BRITISH STRIKE BENEFITS REICH

German Railway Revenues Increased by \$25,000,000— To Help Export Trade

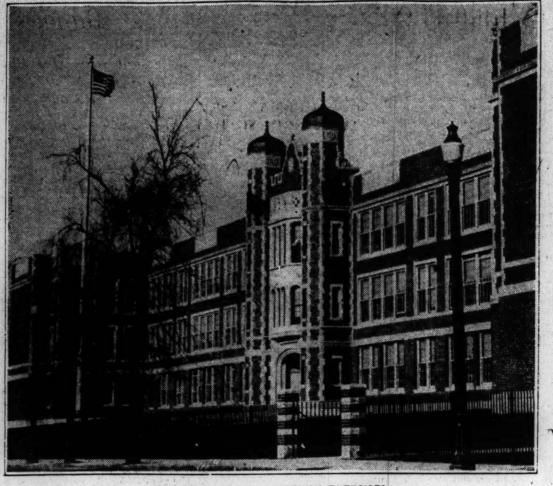

By Wireless

BÉRLIN, Nov. 17-The British coal strike has increased the rev enues of German railways by \$25, 000,000 this year, which extra profit will be used for lowering freight British coal strike Great Britain is furnishing Germany with financial means to compete more successfully with British industry on the world's market.
Although the German railway ad

ministration has been converted into a private company by the Dawes agreement it is still incurring volun-tary losses by lowering freight rates in order to help Germany's export, thereby faithfully adhering to the serve his engagements is overpowered by the consideration that he has not much to repay, having cleared off all the earlier indebtedness." That a nation's currency may experience stabilization without a gold backing was another of Lord D'Abernon's litroduced for iron and steel products of the railways, did everything to enable Germany to compete with other nations on the world's market. Special freight rates have been litroduced for iron and steel products over fur hides grain potatoes. policy of the railway administration before the war when the Reich, which ucts, ore, fur, hides, grain, potatoes sugar, concrete, and for shipment

rency was not based upon gold. There was no gold to base it upon, and no foreign country was at that time prepared to supply the necessary bullion. Confidence was created through restriction, assisted by a more or less illusory mortgage, thus constituting a combination of physical and metaphysical elements which future currency reformers would do well to study.

"There was a kind of ironical justice in the fact that those classes owners modernize their mines. For

FRANCE UNEASY

Press Protests Against the Attitude Adopted by

By Special Cable

PARIS, Nov. 17-Despite the declarations of Benito Mussolini, Premier of Italy, that Franco-Italian relations have entered a new phase, considerable sentiment is still mani- BULGARIA ISSUES fested in France at the astonishing revelations of Italian diplomatic in trigue expressed through the employment of police agents, spies and contrivers of bogus plots on French

making it possible to foment antiFrench feeling.

French newspapers point out that Signor Mussolini coolly ignores these maneuvers in his statement that everything has been arrenged between France and Italy. They also protest that Signor Mussolini still-accuses France of being a meeting place for conspirators. Nevertheless, it is obviously the desire of Signor Mussolini to close up incidents which cannot reflect glory on Fascism. He promises to moderate the transports of the Italian press.

As the French Government is satisfied with having uncovered these

As the French Government is satisfied with having uncovered these plots and put Signor Mussolini in a more reasonable mood it is indeed probable that the whole affair will be allowed to languish. It is unlikely that Signor Mussolini will venture books were for the Queen of Greece, and before she later and the grant of the son of Prince Carol, and the saleswomen took Queen Marie into the son of Greece and heaves the later and son of Greece tow, and heaves she left a large decrease. that Signor Mussolini will venture to push anti-French diplomacy in the present circumstances. It is noted, however, that the idea of a redistribution of colonial mandates has been stimulated. Italy, besides Germany was practically omitted from the number of recipient powers when nandates were given.
In this matter Germany and Italy

have identical interests. Whether this will make them rivals or cause them to work together on a colonial policy remains to be seen. Their situation is curiously alike, both are overpopulated, both are rapidly growing, while Signor Mussolini's attitude recalls that of the Kaiser. This plain statement of the situation of the situati

tion is necessary, but the excitement of the past fortnight will be salutary if it compels France and Italy to face the facts. Politically, the de liberate arousing of hatreds, jealousies and suspicions must cease and diplomatically efforts must be made to come to a clear understand-ing about possibilities amid the con-fusion of Mediterranean colonial

GOVERNMENT LOAN GIVEN TO TELAVIV

By Wireless

JERUSALEM, Nov. 17-The Government has started taking a practical interest in Telaviv, an all-Jewish duced during the building and trade slump, leaving the municipality heavily indebted. The Government has just granted a \$150,000 loan at bank interest to pay off pressing obligations. The first municipal elections in Jerusalem since before the war will be held shortly, and the Moslems and Jews are already campaigning for the mayoralty and the

Alert American shop girls and saleswomen took Queen Marie into tow, and before she left a large department store she had bought five fur coats, with others to be sent to

fur coats, with others to be sent to her suite for inspection.

One of the coats the Queen tried on was priced at \$18,000. "Oh," said Marie, 'quickly slipping out of it. "Please show me something cheaper."

Passing through the gift section, the Queen suddenly stopped and addressing a salesgirl said:

"Id like to see that pretty bottle. It would look very pretty in a room."

The "pretty bottle" was a carafe of green bronze enamel, and it may find its way into the collection of King Ferdinand.

At a luncheon at the Union League Club the Queen delivered a mild reproach to persons who have suggested that her American trip was planned with commercial motives or

planned with commercial motives or that she is here in the interest of

a loan to her Government.
"It is true, as you say of me," she declared, "that I came to America to 'put Rumania on the map.' If you have liked my face rlease do not detach it from Rumania. I am here to defend my country. Rumania is my work, my love, my children, my family, my all."

### OLD NEWGATE PRISON WILL BE PRESERVED

EAST GRANBY, Conn., Nov. 17 (A) -Old Newgate Prison, recently sold at auction to settle an estate, will be preserved as a landmark and Revolutionary relic amid a modern setting. Its new owner, Clarence W. Seymour of Hartford, will turn the grounds into a picnic park, repair the broken-down walls and sentry boxes, and reopen the prison to sightseers. Fees charged will be used to restore the prison to its orig-

inal lines.

The prison, modeled after Newgate in England, held many prisoners during the Revolutionary War after it had been abandoned as a copper mine. It gained fame as the first Connecticut penal institution, being used from 1793 to 1827 for that purpose. By day the prisoners toiled above ground in the shops or at the treadmill. At night, loaded with chains, they were forced to descend: into the mine, 60 feet under ground, o sleep.

# Whose Will Will It Be?

VOUR family and your estate are two of the chief things in your life. Yet I a short delay in making a will may do them both irreparable harm.

If you make a will, you can state exactly how you wish your estate to be distributed to your loved ones. If you don't make a will, your estate will go as the law provides in such cases-perhaps in a way quite different from your desires.

Will your dearest plans be spoiled by neglect to do a duty as easy as making a will? Have your attorney draw up your will and name the National Shawmut Bank of Boston as Executor and Trustee. Thus you can make sure that your intentions will be carried out-and under careful, experienced management.

Our counsel and practical help are cordially offered without charge. It will be a pleasure to talk with you when and where you desire. If you wish, we shall be glad to have you bring your attorney with you.

Write for our booklet: "The Shawmut Plan for Conserving Your Property"

A LL the hard work of wash day can be done by three effective gas laundry servants:

You Can Wash Conveniently

with a Thor Clothes Washer. The gentle action of the machine forces the sudsy water through the soiled apparel, dissolving and freeing the fine Particles of dirt from the fabric.

In illion women users favor the hor because it cleans clothes so thoroughly without wear because it is so simple to operate, convenient and sanitary.

> You Can Iron Comfortably

with the Thor Folding Ironer. The most expert hand launderers cannot excel the work it does. And best of all you can sit down and operate it with hardly any physical effort. A demonstration will show you what a great time-saver it is over your present method, and how much easier the work will be for you.

You Can Dry Clothes Quickly

with the Snow White Cabinet Clothes Dryer in less than an hour's time. You are not dependent on the weather, for the Snow White Cabinet in your laundry or cellar will remove the moisture and sterilize your clothes very quickly. Gas-heated and venti-lated, it provides ample space for an average week's washing.

Come into your searcst Boston Consolidated Gas Company office and let us show you the Ali-Gas laundry equipment described above. These and many other helpful gas servants may be purchased with konvenient low payments. Ask about them.

Federal Survey for October Indicates That Manufacturing Plants Throughout the Area Are for the Most Part Busy

Generally satisfactory employment ville, Braintree, Waltham, Everett, conditions in the New England industries are reported by the United
States Employment Service, district
No. 1, Charles D. Brown, director.

Mathematical ment in industrial employment conditions, with a corresponding increase in employment, was noted

The report says:

"Maine—Although part-time operations continued in the textile, shoe and iron industries during October was especially marked in the rubber shoe, leather boot and shoe, and textile industries.

"In Lynn all plants are running full-time and there is very little uncomplexement evident. Building is accomplexement evident. creased employment in these lines. Overtime schedules obtain in the tile industries in certain centers. Increased activity in building was re-ported, affording employment to a large number of artisans, one city reporting a shortage of experienced carpenters. Farm help is plentiful.

Generally Satisfactory "New Hampshire — Industrial em-ployment conditions throughout the State are generally satisfactory. Reports from many cities indicated that the local industries were operating on full-time schedules. Continued im-provement in the shoe and textile industries was noted in certain sections. The box industry is operating to capacity. Overtime schedules obtain in the printing and wire-cable plants. Building projects under contruction afford employment for several hundred men, with the local supply of craftsmen in all localities adequate for the demand. A plentiful

supply of farm labor was reported

n all sections

"Vermont—Industrial employment conditions throughout the State are generally satisfactory. Practically all plants are running at capacity. In those centers where there is a surplus of labor, the number of unemployed workers was materially reduced during October. The granite

"Massachusetts - Continued improvement in the major industries was reported from all sections dur-ing October. The rubber shoe factories are operating at capacity. In number of men, with the supply of the textile centers, many of the mills craftsmen in most cities ample for have resumed full-time schedules, the demand. and others that have been closed for some time have reopened. The num-ber of released textile workers was decreased during the month. The decreased during the month. The shoe industry is operating at a high level in practically all shoe centers. The jewelry plants are running with night shifts engaged and a shortage of experienced workers exists. The metal working trades continued at capacity production, with a shortage of skilled artisans reported in some of the larger cities. Building throughout the State continued at a throughout the State continued at a high peak, and affords employment

### TEACHERS TO HEAR DR. GILBERT MURRAY

Tufts Association to Meet on New Haven Railroad Reports "Homecoming Day"

MEDFORD, Mass., Nov. 17-Prof. Oxford, and Dr. Daniel L. Marsh, at the Cedar Hill (Conn.), Maybrook who are expected to speak at the road, according to figures just made annual meeting of the Tufts College public, this record business being handled without any congestion, due Teachers' Association next Saturday. Prof. Murray is scheduled to speak at 9:45 o'clock in Goddard Gymna-sium at which time classes will be suspended to allow the student body

and to improvements which have been put in effect at these points.

The number of cars handled over listen to the Regius professor cumbent of the Charles Eliot Norton

chair of poetry at Harvard.

Indications that the attendance will equal, if not surpass, previous records, were shown in the number of notices received from those who have announced their intentions of attending the annual session. of the present college year will be the observance of "Homecoming Day" by the alumni body and the final football contest of the year

at Tufts Oval.
Immediately following the convocation in the gymnasium, the annual election of officers and the business meeting will be held in Packard Hall. meeting will be held in Packard Hall.
John Albert Cousens, president of
Tufts College, will deliver an address of welcome, following which
the Rev. Brewer Eddy of Newton will
speak on "Modern Morals and the
Teacher." A discussion of this subject will follow. Until luncheon
time the program will consist of
music by members of the student
body. Dr. Marsh will speak at the
afternoon session which will be held
in the gymnasium.

### TWO SPRINGFIELD BANKS CONSOLIDATE

SPRINGFIELD, Mass., Nov. 17 (A) -Announcement is made here of the consolidation, subject to approval of director of the college and extension shareholders, of the Third National courses of the college, was in charge

and Chicopee National Banks of this city under the name of the Third National Bank and Trust Company with resources totaling \$35,000,000.

It was said that the new institution will be the largest national bank in Massachusetts outside of Boston. Frederic M. Jones, president of the Third National, confirmed the report that directors of both institutions had approved the merger plan, under which George A. MacDonald, president of the Chicopee National, is to retire Dec. 31.

BANK WOMEN STUDY LOANS Mortgage Loans" was the subject an address by Joseph H. Soliday the regular meeting and dinner of an address by Joseph H. Soliday the regular meeting and dinner of the State Legislature, and consistency of the Massachuber of the State Legislature, and Thomas N. Braden, a member of the board of election commissioners, omen in the Hotel Vendome last the Mrs. Ruth M. Young, presided.

Were nominated for mayor in yesterday's mayoralty primary. There were 16 candidates.

full-time and there is very little un-employment evident. Building is active and provides work for a large supply and demand are well bal-anced. Extensive building operations under way keep local craftsmen well employed. Industrial employment conditions in Malden are at a high

"The rubber shoe industry is operating at capacity, and a shortage of experienced workers exists. large rubber shoe plant which has been closed reopened during the month and will give employment to

500 hands.
"In Waltham, excepting for a slight general surplus of labor, there s no unemployment apparent and all plants are running full time. The construction of a new city hall, two rages affords work for a number of craftsmen. The surplus of shoe workers that was reported in Sep-tember was absorbed during the month. All plants are running, one

iron plant working overtime.
"Extensive building projects under construction throughout the district provide employment for several thousand artisans, with the supply

in all cities ample for the demand.
"Rhode Island—Reports from all sections of the State indicated excelindustry is operating at a high level.
Increased employment in building one locality which is a summer reactivity was reported during the month, with a plentiful supply of artisans in every city. The demand for farm labor decreased.

Sections of the State indicated excellent industrial conditions, excepting one locality which is a summer resort. Increased activity in the jewelry industry absorbed all of the released workers in this line. Increased employment in the textile creased employment in the textile industry was reported with very lit-tle surplus of this class of labor apparent. Building activities through-out the State afford work for a large

"Connecticut-Industrial employment conditions throughout the State are generally satisfactory. The major industries are all operating and a shortage of skilled artisans in the metal-working trades exists in certain sections. Many of these plants are working overtime. Improvement Seasonal slackening in certain branches of the hat industry reported from one center. The rollingmills continued on overtime schedules. Building projects under con-struction throughout the State furnish employment for several hundred artisans, with the supply in most communities ample for the de-mand. A decreased demand for farm help was noted during the month."

### FREIGHT HANDLING RECORDS BROKEN

New Peaks for October

October set half a dozen new, rt Murray of the University of records in freight car performance ident of Boston University, are (N. Y.), and Hartford (Conn.) freight or the prominent invited guests terminals of the New Haven Railto increased efficiency of operation and to improvements which have

> the eastbound hump at Cedar Hill during October totaled 50,635, which was 1433 more cars than in any previous month. Over the westbound hump 59,871 cars were handled, which topped the previous high record of 59,767 made in March this year. The total number of cars humped in both directions at Cedar Hill was 110,506, beating the previ-ous record of March, 1926, by 3825. At Maybrook the total cars pushed

over the eastbound hump was 24.764. beating the record made in March this year by 196. Westbound, the record of 24,705 made in August, 1925, still stands, the number humped westbound in October being 23,942. The total for both directions, however, was 48,706, exceeding the mark of 47,846 set in March, 1926,

At Hartford during October 23,274 cars were handled, which is thought to be a record number, but because of recent changes in the Hartford any direct comparisons.

### DISPUTE ON STATLER WIRING INVOLVES VITAL LABOR ISSUE

Result of Hearing Before Utilities Board at State House Watched by Officials as to Its Effect on Telephone Situation in Other Cities

Marked interest is shown in labor circles over the hearing of the contractors, McCarthy Bros. & Ford, of Buffalo, N. Y., "pull the wires."

New England Telephone & TeleWhen asked what provision for one graph Company, because it involves of its tenants, the United States the basis of a dispute between the Department of Internal Revenue, electrical workers' division of the American Federation of Labor and the American Telephone Company's

subsidiary here.

The issue is whether the teleeration of Labor member unions Brothers up to date.

Shall do the wiring of new buildings On cross-examination of the cro for telephones. The hearing is being held before the Massachusetts Pub-lic Utilities Commission in Room 166 of the State House.

Today the telephone company was prepared to present its side of the case through Charles S. Pierce, a vice-president acting as counsel, following that of the Statler interests, which was given by Warner V.
Taylor, Boston counsel for the hotel
chain, and eight witnesses he produced at the opening of the state inquiry yesterday.

Large Contracts Involved

The hearing is being conducted before a commission of five, of which Henry C. Attwill is chairman and Leonard F. Hardy, Lewis Goldberg, Everett E. Stone and Henry G.

Wells are members.

The controversy, which involves the tie-up of millions of dollars of construction in Boston not only in the Statler but in other projects such as the new Parker House, Univue addition and the Myles Standish apartments and others, all arose

withdraw its men.

How Controversy Arose

making the installation until the In-ternational Brotherhood of Electrical Workers had written a letter to Mr. Statler or his contractors demanding that the interior telephone wiring b done only by members affiliated with their particular organizations," delared Mr. Pierce. He claimed that far from discrimi-

nating against Mr. Statler, the tele-phone company has co-operated with him. It has stopped work at Mr. Statler's request and will resume it out, is that if it is to be responsible for the telephone service to Mr. Statler's tenants, guests, and hotel organization, and to the outside telephone world desiring connection with them, it must build, own, maintain and operate the telephone plant

which gives that service.
Mr. Pierce said he was surprised at the array of labor officials whom Mr. Taylor produced to show that wire pulling is already being done by members of the electrical workers' union other than telephone employees in other cities of the country than Boston and after half a dozen had taken the stand to testify at the hearing, exclaimed: "It looks like the beginning of a nation-wide

New York Situation Cited While the American Telephone Company in New York City and other parts of the country allows electrical workers not employees of the tele-phone company to do this wiring, it was brought out at the hearing by those who testified that since the A. F. of L. unions believe they alone should do this work entirely they are planning to frame a clause givnow work in conjunction with tele-

phone employees.

Explanation of the significance of public interest in the Statler case tion work tied up all over Boston on the work. Lasting three years in like instances, that the labor the project has been the most comand Westchester County, and other parts of the country which the New thoroughly, and reports will be made England company still claims the right to have its own men do. hearing was well represented by la-bor officials and editors.

Richard L. O'Hara, president of the electrical workers of New York City; Edward A. Schroeder, secretary and business manager of the electrical workers of Essex County, N. J.; Herbert Bennett of Greenwich, Conn., president of the State Council of Electrical Workers; William F. Steinmiller of Hartford, Conn., business representative of the local electrical workers. ness representative of the local elec-trical union; Walter J. Kennebec of Springfield, Mass., business repre-sentative of that city's local, and Thomas James Flannigan of Welles-ley Hills, Mass. All six testified at

Mr. Statler's Views Given So eager is Mr. Statler to obtain telephone service for his buildings at Park Square, F. A. McKowne, secretary and treasurer of the com-pany, told the commission, that he offered to pay for the wires to be installed, pay the installation cost per telephone, the cost for pulling the wires and the cost of the sets of bell boxes, if only the teleph

week, was being made for telephone service, Mr. McKowne replied that the United States Army Signal Corps would "pull the wires." No provision company or the American Fed- has been made for service to Luria On cross-examination, it was

brought out by Mr. Pierce, who at tempted to negotiate a compromise by suggesting certain solutions to the problem, that it was not a differ ence between the two companies because of the practice of the telephone company, but one of labor which Mr. McKowne interpreted as a "matter purely of policy.

Mr. McKowne said he was willing to have the telephone company con-tract to McCarthy Bros. & Ford for the installation of the remainder of the wiring or that he would be willing to have the telephone company employ local Number 103 to do the remainder of the work, but that he was not willing to have the company's own employees touch the wiring.

Testifies for Contractor

Karr Parker, electrical engineer in charge of the work for the Buffalo pulled under his supervision to room of convenience, such as wrenches, versity Club, Ritz-Carlton Hotel, the Harvard Business School, the Belleover the question of who should been installed by the telephone comfor removing the heavy transmission "pull the wires," i. e., install the pany, but under cross-examination mechanism from trucks and for wiring in the walls from the base-said that the electrical contract working on them conveniently and "pull the wires," i. e., instell the wiring in the walls from the basement to the various floors in the structure to which telephones could be attached.

New Hampshire University Soon to Have New Head

CONCORD, N. H., Nov. 17 (Special)—One hundred persons are under consideration for the presidency of the University of New Hampshire, soon to become vacant through the resignation of Ralph D. Hetzel.

It was thought that Edward Lewis, tural College, might be induced to come to New Hampshire, but it is emain where he is. Kenyon L. Butterfield, former

president of the Massachusetts state astitution, is said to have recomnended several men to the New lampshire university trustees.

Dr. T. Lawrence Davis, dean of the Boston University College of Liberal Arts, has come under con-sideration. He is a former resident of Manchester, having been gradu-ated from high school there before he entered Boston University and later the business school. He was the first student to receive his diploma from that associated school.

The name of Prof. Henry C. Morri-

son, of the University of Chicago, has been urged. He is graduate of Dartmouth, served for a time as superin-tendent of schools in Portsmouth and for several years was state superintendent of public instruction.

Ernest W. Butterfield, another Dartmouth man and now state com-

tioned for the university presidency.
Another name is that of Louis P. Benezet, superintendent of Man-chester schools. He also is a Dart-mouth graduate. The possibility that Craven Laycock, Dean of Dartmouth, might not be adverse to undertaking the direction of affairs at Durham has been remarked upon.

been remarked upon.

### METRIC SYSTEM BILL PREPARED

volving trade co-operation with foreign nations which have already adopted the metric system.

The bill has been indorsed by national trade.

adopted the metric system.

The bill has been indorsed by national trade and commercial organizations such as the American Society of Mining and Metallurgical Engineers and the Associated General Contractors of America; it is supported by agricultural leaders in Congress, George W. Norris (R.), Representative from Nebraska, and Arthur Capper (R.), Representative from Kansas, being in favor of the proposed change to the measuring system used by "all the civilized nations with the exception of the United States and Great Britain."

Sees Agricultural Support

If the bill comes to a vote, it can count on support from the majority of the agricultural bloc, according to a survey made during the last session, as the American Farm Bureau Federation and numerous smaller farm organizations have demanded favorable action by Congress.

The Britten bill may thus be car-

ried through as a "trailer" to agri-cultural relief legislation, on the contention that adoption of metric standards would promote sales of American farm products in world markets which at present use a different standard measure in purchasing from that which American exporters use in selling.

porters use in selling.

Mr. Norris in announcing his support of the bill declared, "Our present system of weights and measures is so out of date that we ought to take some steps to remedy and better it, and it seems to me that the metric system does this."

The proposal is one of those hardy perennials which crop up during each succeeding session of Congress, arouse little opposition, and yet fail to pass. Similiar bills providing for establishment of world metric measurements have been reported favorably by seven preceding House Committees on Coinage, Weights and Measures.

Believe Time at Hand

It is urged by its advocates that this is the crucial time to push for

the general interest in holding for-eign markets won since the war, in increasing the favorable balance of American trade, and in stimulating foreign purchases of farm products will open the way for action by

TALKS ON DEBTS

Former Labor Minister Dis cusses the Control of World Finance

Special from Monitor Bureau LONDON - William Graham, fornerly Financial Secretary to the Treasury, in the MacDonald Labor Government, inaugurating a series of lectures under the auspices of the Fabian Society, dealt with "The Control of World Finance." He said it was sometimes suggested that conrol would fall, under post-war conditions, into three groups, viz., America, with influence in South America as well: Europe under the leadership of Germany, and Great Britain as the center of the British Empire. glance at the map with reference to the probable distribution of world commerce, he said, indicated that a distribution on these lines was a

omewhat remote contingency.

Much depended on the ultimate adjustment of world debt, declared Mr. Graham. Cancellation of interallies debt was undoubtedly the ideal method, but America's attitude, which had always regarded these debts as commercial propositions, he said, made this impossible. For Great Brit-ain the consequent sacrifice had been heavy, especially in view of its consistent preparation for a return to the gold standard. Taking the funding arrangements as they stood. America had so far, he said, approximately half the sums owed to it by other countries placed on a definite arrangement. Great Britain was committed to the payment of £33,-000,000 to £36,000,000 annually to the United States, and arrangements so far suggested that it was very doubtful whether Great Britain's debtors would in fact ultimately

make up that annual sum.

The speaker believed that, at all events, until the interallied debt arrangements were complete, there was little chance of reconsideration of policy by the United States. Distinguished Americans had just put their signatures. their signatures to an impressive apworld commerce. That could never be a reality apart from modification of their strict insistence on a defi-

of their strict insistence on a den-nitely commercial settlement. Control would not be distributed, the speaker declared, in the three-fold manner indicated. During recent years there had been an almost in-discriminate scramble of British and of the annuities. But it was in the common interest that she should be lniked up with Great Britain and

nomenclature.

In striking contrast are the colorful names of early Washington, or pre-Washington, which still survive in places. The Department of Justice, in the course of its investigation of titles in the District of Columbia and nearby Maryland has turned up many picturesque place names. "Cabin John," a curious name, familiar hot only to Washingtonians but to tourists, is a corruption of "Captain John," an Indian who lived in the valley of the stream known as "Captain John's Run."

A list has been made of the orig-

A list has been made of the original land patents along the shore of inal land patents along the shore of the Potomac River. Down the river, the patents include "Bully's Disap-pointment," "Billingsgate," "Arrel's Folly," "St. Philip," "Jacob" and "Whitehaven." The original patents in Georgetown were? "Salop," "Salom" or "Salem," "Knave's Dis-appointment" and the "Rock of Dumbarton" along Rock Creek. Be-

Dumbarton" along Rock Creek. Between these and the river were later laid out smaller thacts, "Noise Enough," "Water Piece," "Conjurer's Disappointment" and "Frogland." All these were down the creek. Going up were "Berlin," "Philadelphia," and James Holmead's "Mill Seat."

The patent of "Widow's Mite," beginning on Braddock Rock, south of the Naval Hospital crossed Rock Creek just below P Street. Between it and the river was the "Vineyard." East of the "Widow's Mite" along the north shore of Goose Creek lay "Beall's Levels," originally patented to Col. Ninian Beall, and on the other side of the creek was "Duddington Pasture."

Duck Creek ran up into the land ast back of the White House. A acetious John Pope named his roperty "Rome" and the stream on high it was located "Tiber" so that isitors to the New World might find

and even among the 26, some letters are undesirable. For example X is not used nor Y. It has been found expedient to discard J because it is too much like I. There has been a tendency to help things along by spelling out the letters, Tea for T, Eye for I and so on. but that is hardly an improvement.

In the same way numbers as designations for streets are unsatisfactory to those who would preserve local individuality and color in street nomenclature.

Abbey Manor.

East of the Navy Yard there were a number of patents, most of them dating from the seventeenth century. One of the oldest is "Long Meadows" in and north of the city proper on the eastern branch. Most of the tracts contained from 300 to 500 acres, with a narrow shore frontage and running back into the country. Among those on the eastern branch were "Seaman's Delight," "Meurs," "Scotland," "Barbadoes" and "Yardow."

Mr. Winston Would Meet German Claims Out of Surplus in Treasury

Special from Monitor Bureau WASHINGTON, Nov. 16-Liquidation of American claims without confiscating German property has been suggested as a guide for the settlement of the alien property controversy by Garrard P. Winston, offered the suggestion before the House Ways and Meons Committee now holding hearings for the pur-pose of drafting legislation incor-porating a settlement plan to be pre-sented to the House when it con-

He informed the committee that the Treasury had no particular plan to offer. It was interested solely in obtaining an equitable liquidation in keeping with American ideals of fair play. He pointed out that under the recent Supreme Court ruling the de-cision on returning German prop-erty was entirely in the hands of

Congress.

Asked if he could offer a possible solution of the problem, Mr. Winston submitted a plan which differed from that proposed in the spring of this year by the Treasury. That plan would have raised \$100,000,000 by the sale of special bonds, the money to be used for the immediate settle-

Would Appropriate \$100,000,000 The suggestion he presented to the committee was that Congress appro-priate \$100,000,000. This sum, to-gether with the \$30,000,000 which Germany will pay this year toward the costs of the American Rhine army, \$12,000,000 that will be paid during the year on reparations, and the \$26,000,000 now in the Treasury by the 1927 payment under the Dawes plan, he added.

plan, he added.

The remaining \$50,000,000 of Government claims, Mr. Winston said, would be withheld until all private charges had been reimbursed. He said that the Government could afford to be generous to its citizens; that it was the function of good government to put the claims of its citizens; first was the function of good government to put the claims of its citizens first.

ment on account of the Mixed Claim Commission awards was fixed at 21/4 per cent of the receipts from Germany under the Dawes plan annuities available for reparations, from which the United States is re-

The Undersecretary said the money due could be paid in Germany in marks, thus avoiding complications incident to any attempt to have German marks converted into American dollars in repayment of the claims of Americans. This, he said, was the simplest method, and would be a big thing for the United States to do and would put it on record before the world as standing against confiscation of German private property, as well as establish firmly the policy of not seizing private property in any war in which this country might be

keeping with the Dawes Plan, which

cussion by demanding if a \$100.000,000 appropriation would not reduce the Treasury surplus to such an extent as to make impossible a tax rebate such as was proposed by President Coolidge. Mr. Winston agreed that that would result.

Mr. Garner then raised the question of taking money from the public treasury to pay claims to private citizens of a foreign country. He said that there was approximately \$500,000,000 in claims held by American citizens against Mexico, and that a precedent established on German property might involve Congress in

property might involve Congress in claims against other nations.

He also questioned the proposed policy in its relation to what other countries had done, pointing out that seized property was held by some of them to satisfy claims not returned. Mr. Winston agreed that this was so, but repeated that his plan was in keeping with "American ideals" and ultimately should be incorporated in international law.

### TRADE AIRPORT SITE PROPOSED

New Jersey Meadow Area Urged to Mayor Walker by Merchants' Board

Special from Monitor Bureau NEW YORK, Nov. 16-A commer dal airport for New York, located in the New Jersey meadows adjacent to the western entrance of the Pennsylvania Railroad's tunnel under the Hudson River, has just been recommended to Mayor James J. Walker by Richard F. Hoyt, chairman of the Merchants' Association's committee on aeronautics.

The site recommended is near Secaucus, N. J. It was selected after four-year survey of available as unallocated and accumulated from retained German property, would be devoted to meeting the \$190,000,000 of allowed private American claims. The difference of \$22,000,000 could be met accessible to the center of New York accessible to the center of New York liked and they are operating fairly. for the bulk of the traffic supporting The people of our islands are hap-

> committee's conclusions were committee's conclusions were re-ported by Mr. Hoyt, in part, as fol-

BOSTON & ALBANY TO HAVE NEW PLANT

at Worcester

The Boston & Albany Railroad is to reconstruct entirely its engine house, turntable, machine shop and coaling plant at Worcester, at an approximate cost of \$600,000, it was announced today. While the new engine house and plant will be in the same location, the rearrangement of buildings will be a notable feature of the new construction.

The first work to be done will be the construction of the new turn-table. The new engine house will have 15 stalls. The construction will be steel frame encased in con the size to be approximately 320 feet by 112 feet and it will be heated by will be of the latest type with the three bearing design and the diameter will be 90 feet.

The new ash pit will be of the water type. It will be built of reinforced concrete and will be re-

inforced concrete and will have a capacity of 200 cubic yards. The ma-chine shop will be built of reinforced concrete and will have all of the necessary machinery and tools to perform running repairs on locomo

CONCERT AT WELLESLEY

WELLESLEY, Mass., Nov. 17 (Spe cial)—The second in the Wellesley College concert series will be given tomorrow evening by the Elshuce Trio. This trio gives concerts at the women's colleges every year through the courtesy of Mrs. Elizabeth Sprague Coolidge. Mrs. Coolidge founded a music hall at Pittsfield Mass., several years ago. Last year she transferred the annual festival t a music hall which she built at the Library of Congress and which she presented to the library. The trio has played at Wellesley before and is very popular.

### An Indian Message of Beauty From Tahan to White Children

From Warpath to Lecture Platform, This True American Comes to Interpret Uncomprehended Race

By CLARKE KNOWLTON

He speaks, and his voice makes a deep music. . . The blanket slips from his shoulders, revealing a slensupple, colorful figure clad in deerskin garments—the same garments he "wore upon the warpath some 60 years ago." . . . And in watching this figure one forgets the background, and the words "I was free born!" spring into mind; for there is an inimitable something of wind and water about those effort-less, flowing gestures. One watches the hands—a bird, a buffalo,

galloping horsemen: they tell the whole story, tell it in the sign language once used upon the plains—carelessly, continuously, one suspects unconsciously, they testify to an art now as vanished as the life which gave it birth. . . And with a start one becomes aware that hands of the children are also in motion that they children are also in motion, that they have caught the significance of those picturing hands: crudely, clumsily they attempt to follow, instinctively answering the call of this strange

And a shadowy world takes form and color. "Tahan, you are good!" Zepkhoeete said to him each morn-ing. "My Father-Chief, you are good!" ing. "My Father-Chief, you are good!" replied Tahan. "My son, you've told the truth, I am a good man, and you're a good boy!" declared Zepkhoeete, and that was the way they started the day. . . The training of an Indian boy in the days before the white man had taught them other ways. . . . Children's games. . . . Stories. And through it all, everywhere, the bright substance of the

where, the bright substance of the Indian ideal: "Truth first, though self and beloved nations perished!" "Manhood"—which included courage, faithfulness, honesty, and strength; "Self-purification" and "Unswerving realization of man's dependence on a power beyond himself"—a power manifest in recognizable qualities, a power that gave man joy and life Tahan's Story

learned among the Klowa tepees in the days before the Civil War. Something of his own story he tells: how as an infant he was adopted by a young Kiowa war-chief who found him after a Klowa raid; how he grew up ignorant that he was the son of Al-zada, an Indian woman of the Osage tribe, and "California Joe," a white man, well known frontiersman and intimate of "Buffalo Bill," Kit Carson, Jim Bridger, and the like. How, after that terrible winter night when the white soldiers fell upon the sleeping Indian village, he with others was driven through the snew, naked and bleeding, having seen their property destroyed, their friends killed, and their ponies shot, to a white man's fort; and how there he was recognized as of white blood, his identity established through the hard-wrung testimony of his foster father, how he was separated from the only parents he had ever known and sent into the white man's land. How he escaped from the Texas ranch, joined a wild band of outlaw Indians, and

escaped from the Texas ranch, joined a wild band of outlaw Indians, and frontier with a price upon his head. He was 30 when he learned the alphabet; at 37 he was an ordained He was 30 when he learned the alphabet; at 37 he was an ordained Presbyterian minister with a knowledge of English and classical languages—he had a strong preference for Greek—as well as of many of the 50 Indian tongues still spoken

tap for the social dances, that furnished the rhythm at the yeligious festivals; the drum with its slow insistence, the drum with its measured vibration, the drum with its possible incitement, expressive of all states and stages of feeling—and the deep boom of the water-drum could colonel Cantu Socs Proces Colonel Cantu Sees Progress

states and stages of feeling—and the deep boom of the water-drum could be heard for 10 miles, it was said.

Chief Tahan and his daughter have recently completed a tour through rmont. This winter they plan to appear again in some of the larger cities—Boston, Washington, Cleveland and many other cities have known them in the past. They wish to present again to the children the RIPPLE of deerskin . . . a flash of blanket . . . proud eagle feathers, strange against the commonplace background; the audience grows quiet, interested, a little skeptical; he stands above them, remote, unsmilling—the white cloud glory of the amazing headdress a triumphant challenge to unbellef. Tahan is back on the platform, back on the platform after an absence of some years, back on the platform to face children of the platform to face children of the last, with a message of great spiritual beauty drawn from the intimate life of an uncomprehended race.

Dry League Protests Presidential Candidate Favoring Liquor

WASHINGTON, Nov. 17 (AP) - A gorous campaign to combat the lovement to nominate a wet can-

"We are hoping that the place of education in Africa will be greatly increased and that European governments will more and more take over the education of the natives," Mr. Sibley said.

TWO-CENT TAX ON 'GAS' URGED FOR ALL STATES Special from Monitor Bureau CHICAGO, Nov. 17—The American Oil Men's Association, meeting here in national convention, went on record as favoring a uniform state tax

"movement to nominate a wet candidate for the presidency and to insert a wet plank in the national party platforms," has been mapped out for the Anti-Saloon League. The organization's executive committee, meeting here to consider the wet-and-dry aspects of the new Congress, evolved three general strategic projects to meet the "challenge" of modificationists' forces "effectively" in the campaign leading up to the 1928 presidential race.

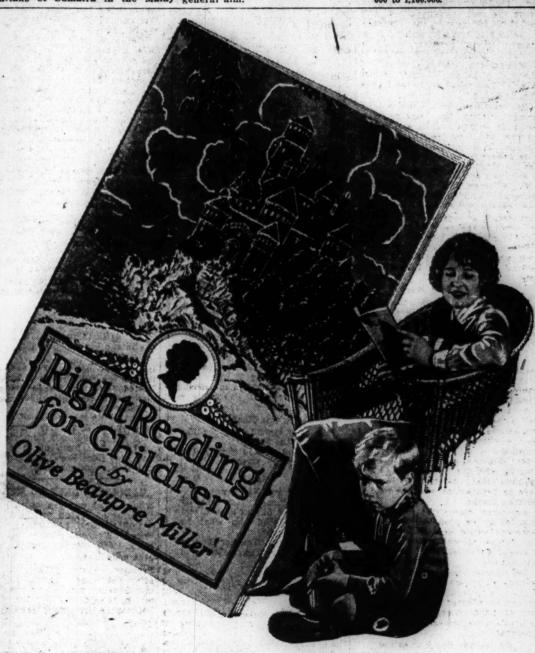

In this plan, particular emphasis was placed upon efforts to reach "the indifferent voter with information on the issues involved, and to arouse the non-voter to the need for his exercise

ord as favoring a uniform state tax non-voter to the need for his exercise of two cents a gallon on gasoline, of the franchise to defeat the highly

to elevate the status of the prohibi-tion enforcement unit to the rank of a separate bureau of the Treasury Department, and to place prohibition agents under civil service.

A special committee was authorized to study the proposal of Lincoln C. Andrews, Assistant Secretary of the Treasury, for replenishment of the diminishing supplies of medicinal liquor.

SHAWINIGAN WATER & POWER CO. MONTREAL, Nov. 17—Shawings Water & Power Company has announce a plan to split its present stock of \$10 par into four shares of no-par value, it creasing the number of shares from 278 000 to 1,100,000.

# How One Mother Has Helped All Mothers

"Nothing to do," sighs one youngster. "Always on the go!" is the lament about another. Is there any more difficult or more important problem than managing children? The great question is how to direct and yet not restrict; how to provide wholesome activity and yet keep it

Reading! Many parents know there is nothing more helpful in developing happy and wholesome children than reading. But what shall our children read? They are not able to choose for themselves.

In this free book, "Right Reading for Children,"
Olive Beaupré Miller tells you how she solves this
problem for herself and for all mothers and fathers.
She tells how she selected for her child and for all
children the fundamental literature—the reading every
child ought to have and published it as The BOOKHOUSE Group of Right Reading.

The Perfect Combination Mrs. Miller brought to the task a sympathetic grasp of the child's point of view which only a mother can

As Editha Parsons of Syracuse University wrote, "The material was chosen by a woman well fitted for the task—an educator, a writer and herself a mother—certainly the perfect combination." She searched the whole world of literature, applying to every selection these three basic tests:

Has it literary merit?
 Will it interest the child?
 Will its influence be for his good?

The BOOKHOUSE Group is graded so that every child may have just what is best for him. It is indexed in several ways, one of the most valuable being an ethical theme index. Illustrated by more than forty distinguished artists. Printer and binder have combined to make it a perfect piece of publication craftsmanship.

For Christmas

There could hardly be a more suitable, more sensible and more resultful gift obtainable than The BOOK-HOUSE Group. Send for the free book now. You owe it to your child to know what Right Reading can do for him.

### ELECTRIC WELDING SUCCESS MAY REVISE BUILDING CODES

Results of Tests at Carnegie Institute Lead to Suggestion That All Large Cities Be Authorized to Use Process

Special from Monitor Bureau CHICAGO-Not only is the penetrating clangor of the riveter on structural steel silenced by the electhe Carnegie Institute of Technology tric welder, but the process appears under the direction of J. M. Daniels, structural steel silenced by the electo be successful and, in some instances, superior, it is indicated by Buildings and Building Management in reporting on recent tests of welded steel joints at the Carnegie Institute of Technology at Pitts-

The results are so gratifying to those concerned," says the report, "that the suggestion is made that . . . steps should be taken to revise building codes of large cities in order to recognize and authorize welded framework under suitable

specifications."
"One of the most striking things developed by the tests," said this periodical, "is the strength develthese welded joints—a that surpasses in most cases the ultimate strength of the members joined.

Comparative Tests Succeed

'Another remarkable fact is that all comparative tests of similar specimens (that is, of specimens made up of identical members, connected one specimen by welding and in the other by riveting) gave results de-cidedly favorable to the welded

"If these are normal results for weight of steel used in the structural framework of buildings seems

The tests were carried out with great care both as to applying the ads and selecting the material from which the specimens were made. They appear to demonstrate conclusively, according to the article, that: "Welded joints can be constructed in such manner as to develop fully ultimate strength of the struc-

tural members connected Beams and girders can be connected to columns so as to produce

absolute fixation.
"Lines of beams or girders can be connected so as to provide complete continuity across the supports, whether the supports be girders or

Sustain Greater Load

'A steel I-beam of given section and length will sustain a far greater load if fixed at its ends by a suitably ported by standard riveted connec tions consisting of top and bottom angles. A nine-inch standard I-beam framed between rigid upright columns eight feet apart by means of specially designed welded connections sustained a load 25 per cent greater than a beam of the same size and length framed between columns by means of riveted top and bottom angles of one-half inch thickness.

"A plate girder assembled by welding, and consisting of nothing but sheared plates, has a far greater nding strength than a riveted plate-and-angle girder of the same weight, due to the better distribution of the steel in the cross section. A 15-inch plate girder assembled by welding and simply supported on a 14-foot span developed more than 50 per cent greater strength than a riveted plate-and-angle girder of the

depth and the same weight. tension member, such as is in trusses, connected at welding, can sustain a greater load than a member with wise identical. Comparative tests of such hangers resulted in failure by tension of the welded member at a load 30 per cent greater than that at which the riveted member failed."

More Than 20 Specimens Tested More than 20 specimens were

separately tested by means of an Olsen testing machine of 400,000 pounds capacity, says the article. Each specimen was loaded to failure and its yield point, or elastic limit, and ultimate load was determined.

"The welded joints designed and made for these tests are identical with the joints used for the new Sharon Building of the Westinghouse Electric & Manufacturing Company, is now being fabricated and erected by the American Bridge Company. "They were designed by Gilbert D.

Fish, consulting structural steel engineer, in co-operation with the arc-welding engineer of the Westinghouse Company.

"The adoption of welded connec-tions for the structural framework of this building and the carrying out of these full scale tests are due to president of the company in charge

of population."

While Lord Stonehaven and Wife Accomplished Most of Distance by Air, Many Hundreds of Miles Were Traversed by Donkey, Camel and Motor

PERTH, W. Aust. (Special Corre- reliable air service than in Ausspondence) - When the present Gov- tralia. ernor-General, Lord Stonehaven, arrived in Australia he said he intended to visit every portion of that lin) had stated that western Ausgreat territory as soon as possible. Within 12 months he has accomplished that object—a feat no other Governor-General has ever achieved. But this has been possible only by flying over the spaces which Lord Stonehaven has viewed in a unique tour of adventure extending from bad yielded 25,000,000. The harvest bad yielded 25,000,000 bushels but a vielded 25,000,000 bushels but a Melbourne, his official headquarters in the south, through New South pected this year.

The journey of the GovernorGeneral around Australia was not
accomplished wholly by flying, although most of it was done in the
air. He and his wife traveled hun-Wales, to Queensland in the north, across to Darwin, at the top of Australia, and around the northwest to Perth. No Governor-General has acquired the knowledge Lord Stone-haven now possesses of the Dominion in which he represents the King, either in the dramatic manner of doing it, or the all-embracing com-pleteness of the journey. Governor's Wife in Air

Lord Stonehaven was accompanied throughout the trip by Lady Stonehaven, and he told the people of Perth at the public reception that although his wife was a bad sailor she was perfectly happy in the air and, like himself, had enjoyed every very graphic, making an imperishmoment of the long and thrilling flight. The peculiarity of the Governor-General's arrival in the capital city of western Australia was that. pied the chief attention of delegates whereas all his predecessors had come in by the front door (the ship-ping center), Lord Stonehaven entered by the back, via the Northwest

creased the patriotic warmth of the

reception, which was attended by

large and enthusiastic gathering. As Lord Stonehaven desired, at the clubs to concentrate on a few first opportunity, to place himself in definite pieces of work rather than a position of being able to appreciate the magnitude, variety and character of the problems that Australia is facing, he could not have designed better method of doing it. Replyin to congratulatory addresses, His Excellency said to have gone around that great continent by air had been an experience that had justified the confidence that the people in England had in the destinies of Aus tralia in the hands of the Australians. The fact that he and Lady Stone haven had been able to fly over those magnificent distances in great comfort and in absolute safety showe the immense advantages that avia-tion had conferred upon humanity, and particularly upon Australians, where the centers of population were necessarily widely scattered. As the result of his experience he could say where there was a more efficient and

### CHILD LABOR CURB SOUGHT

Massachusetts Committee Discusses Legislation Pending and Passed

"Child labor regulation is an integral part of all social effort to safeguard and promote the welfare of boys and girls. The final stage in achieving it may not be long in duration but it is big with obligation," Grafton D. Cushing, chairman of the Massachusetts Child Labor. of the Massachusetts Child Labor Committee, declared addressing the embers at their annual meeting

held yesterday afternoon at the new offices, 41 Mount Vernon Street.

The work of the committee will go steadily on until its object is achieved, he said. The work for the coming year will be chiefly along educational and legislative lines, he said, supporting or opposing various measures to come before the Massachusetts Legislature, correcting and adjusting present legisla-

The most important work of the last year, Mr. Cushing said, was the preparation of its new publication, "Child Labor in Massachusetts," which has just been received from the press. It was written by Ray-mond G. Fuller and Mabel A. Strong. It is particularly important in view of the defeat of the Federal Child Labor Amendment. It gives an outline of conditions in Massachusetts and the problems which still have to

be met in state legislation.
"There is reason to believe that the study here reported will prove interesting and valuable beyond the confines of Massachusetts, since it deals with questions of vital concern to the people of other states and of the Nation," Mr. Cushing said. "It represents one of the first attempts Labor Amendment to restate the principles underlying the reform movement and to indicate its opportunities and prospects. At the same time, by analysis of the situation in an advanced state, it reveals the in-

stage where it is erroneously con-ceived as practically finished."

The following officers and directors were elected to serve for the ensuing were elected to serve for the ensuing year; Grafton D. Cushing, chairman; Frank Leveroni, vice - president; Charles F. Bradley, treasurer; Mabel A. Strong, clerk; Miss Esther G. Barrows, Dr. Merrill E. Champion, Richard K. Conant, Roy M. Cushman, Mrs. Edward C. Mason, the Rev. George P. O'Conor, Mrs. George W. Perkins, the Rev. Malcolm Taylor, and Mrs. Philip E. Tripp.

> Experience, the speaker continued showed that while in the past these communal disputes were generally concerned with particular mosques or places, now there was a tendency to treat any dispute regarding a paraffecting or purporting to affect all throughout India. That was the most serious menace which they had ing up the debate, expressed himof the interference of outsiders.

Noninterference Policy

Sir Alexander observed that now the communal leaders were ap-parently willing to compromise, so there was no need to approach them. The people to be approached were the masses. This could only be done by local officers. The Government of India could only indicate the general policy, through local governments. As regards the resolution put forward by Mahomed Yakub, the Government could not undertake to introduce legislation because of their policy of noninterference in religious and the amendment were vagur and matters.

Sir Hari Singh Gour spoke against the conference. Communal tension, he said, was only confined to British. This they accordingly did.

India. In the native states it was nonexistent. Settlement of religious rights could not cure the tension What was wanted was a remedy for olitical discontent in the country.

Lala Lajpat Rai was of opinion Laia Lajpat Rai was of opinion that no amount of legislation would solve the communal problem. If India wanted a democratic form of gov. solve the communal problem. If In-dia wanted a democratic form of government it must be prepared to pass be again in a position, though with-through such struggles. But let the out its fault, of asking the departstruggle for power cease and then ment to authorize this issue, still there would be peace. He declared leaving undetermined the question of that the Viceroy's recent speech had the proprieties of the items questione much toward effecting an attioned by Mr. Mildram. mosphere of peace and good will.

## Rail Lines' Entry in Aviation INCREASE PLEA Is Predicted by Air Secretary

Mr. MacCracken Thinks Passenger Service Certain to Follow That of Mail and Express

Jr., Assistant Secretary of Commerce for Aeronautics, will, within the next fiscal year, be interconnected by air transportation carrying express, mail, and passengers. Approximately 7000 miles of such airways are already under actual operation Mr. Mac-Cracken declared, with 5000 miles to be added during the present fiscal year.

These developments in commercial aviation, for the immediate future, were made known by Mr. Mac-Cracken in commenting on the announcement that the American Railway Express Company had entered the air transportation field.

That the railroads might be ex-

pected to add air service to their ground equipment was also ex-pressed by the Air Secretary. He pointed out that the American Railpected that once they had organized the air express service, they would take up the business of transporting passengers by airplane.

Trade Routes Expanding

"This announcement of the new seriously to commercial aviation," necessary facilities for a great and Mr. MacCracken said. "It is a tre-successful commercial air service."

### HIGH SCHOOL TO HAVE

The fourth annual potpourri en tertainment sponsored by the English department of the High School of Practical Arts, given in the school hall recently, will be repeated tomorrow evening. The program includes a one-act play presented by the dramatic club. Miss Affy Mc-Coubrey is to give a solo dance with an Oriental setting. The style show, always an important part of the program, will be preceded by an exhibition of costumes of the past 125 years. Among these is one which was worn in 1800 by Anne Quincy, niece of Dorothy Quincy, who married John Hancock. Hats, dresses and coats made in the school this fall are also to be displayed.

musical variety in the program.

Special from Monitor Bureau

WASHINGTON — The important to air transportation for commercial purposes. Today mail and express is hauled. In a little while passengers will be carried. This new development can be expected to precede the most extensive expansion of com-mercial aviation.

"There are uncalculated possibilitation of express by air. Careful investigations have been made by this bureau through a committee to deter-mine what service air transportation could render industry and business and how it could be made available.

Time Saving Vital Factor "The data already gathered show that there is no doubt that a huge saving of time and hence costs can be effected through carriage of express by air. That business men have realized this possibility is evidenced by the announcement of the

new service by the American Rail-way Express Company. way Express is operated by the "With the constant improvement railroads, and that it could be exsuch as lightning, mapping, emergehcy landing fields, adequate airports, radio direction, fog protection facilities, weather information and other factors, the field of commer-"This announcement of the new clai air transportation will expand. activity of American Railway Ex- The Air Commerce Act of 1926 espress Company shows that the bust-ness men of the country are taking of aiding the establishment of the

### Stamps of Old and New Finland Reflecting Epochs of History

Also the First King's Head Issue Sent Out From India's Government Printing Works at Nasik

AMONG those countries which Russification, pursued by the statescame into prominence during men of the second Tsar Nicholas, inthe period when the map of cluded the postal issues of the vas-

newly formed states, has had some-thing to do with Finland's obscurity, nonexistent. the collector's viewpoint.

The younger generation of collectors, beginning with the issues of Finland as a Republic, are apt to lose sight of the fact that the Finns had their own stamps, bearing the nacontinued to use a separate and distinctive issue up to the year 1910. Poland, with its solitary postal emission, is a similar example, and the two countries might well be described as nations reborn, both tracing their revival from the 1917 revolution in

Finland. Suomi in Finnish, has during the latter part of the Russian other 500 has been added since the proclamation of the Republic. First Stamps Scarce

Finland's first stamps are scarce lector. The design is the shield bearing the familiar Finnish lion with two post horns below and sur-mounted by the imperial crown of Russia, with the value in English and Russian to left and right. Those stamps are imperforate, being pre-pared from a die engraved by Melgren, and printed at the Finnish Treasury. The first perforated — or more strictly speaking rouletted — stamps were introduced in January, 1860, and these, from the size of the teeth, are in a class quite to themselves. Copies of this series of issues, with the large serpentine rou-lette, are not as a rule in good condition, one or more of the teeth being usually missing.

The type most familiar to the average collector is the design en-graved by W. Brandstake, and printed from plates supplied by the Danish firm of H. H. Thiele. The arms within an oval frame, with circular piercing at each corner for the Alfohl and Olney Inc. duty, is the design by which Finland is best remembered, and was in use,

with but slight alteration, for a period of nearly 17 years.

From 1891 onward the stamps of Finland lose all individuality, being so like those of the ruling country that many a young collector—and those of more mature years too— have found a Finnish stamp among their Russian issues. The policy of

Owing to the remainder over 35,000 in the country of the remainder over 35,000 in the country of the remainder over 35,000 in the country. Owing to its remote position it always enjoyed, even during the union with Sweden, comparative freedom, and it was only familiar design of Finland Statement of Soviet Russia, and the now familiar design of Finland Russia did during the latter part of the Russian would have disappeared. Russia did annexation that repressive measures not approve the Finnish Republic, were introduced. We can obtain a and a Red and White Army strugfair idea of the situation from a gled for supremacy. In return for glance at the Finnish prewar issues, German aid the White Finns elected and the collector is able to form an opinion as to the effect of Russian rule in the country. In 1809 when Finland was ceded by Sweden to Russia, there were only 33 post offices in the country, but the population was barely 1,000,000 at the time.

Prince Frederick Charles of Russian as their king, but that gentleman never came to Finland and the country remained a Republic. The first issue of the new republic, with some color changes, has been retained, and the design of the Finnish lion and the design of the Finnish lion and the design of the Finnish lion as the line of the remained and the country remained a remained a second remained as their king, but that gentleman never came to Finland and the country remained a Republic. The first issue of the new republic, with some color changes, has been retained, and the design of the Finnish lion as their king, but that gentleman never came to Finland and the country remained a Republic. The first issue of the new republic, with some color changes, has been retained, and the design of the Finnish lion as the remained a Republic. and the collector is able to form an Prince Frederick Charles of Hesse tion was barely 1,000,000 at the time.

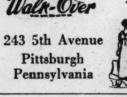

A century later there were 1000 post offices, and in 1910 the number had reached a total of 2045, to which anreached a total of 2045, to which and reached a total of 2045, to which and the design of the Finnish lion is as prominent as the blue and white flag which now flies everywhere.

> King's Head Stamps of India Since the appearance of the local printings, the King's Head stamps of India are claiming a certain amount of attention. The plates were sent out to India by Messrs De La Rue some, time ago, and the Indian Government printing works at Nasik is now producing the stamps. The first values from the local presses to be put into circulation were the 3 pier slate ½ anna green, I anna brown, and 3 annas blue, these being the duties in urgent demand and which are used in large quantities. The ½a. stamps. The first printings were not quite so sharp and clear as those at the Crystal Palace, London, comproduced by De La Rue in London, petition. but this appears to have been remedied in more recent consignments. The next value to make its ap-

SEA UNLIMITED SOURCE OF POWER

Possibilities of Using It Described in Paris

PARIS. Nov. 16 (AP)-The sea is an unlimited source of motor power. which can be obtained at a minimum cost, Prof. Georges Claude, one of France's leading natural scientists, told the Academy of Science. Professor Claude, who is the inventor of synthetic ammonia, exhibited a generator which he had constructed to get power from the sea.

The method on which Professor Claude and his associate, Professor Boucherot, are at work involves the utilization of the difference in temperature existing between the always lukewarm surface waters of tropic are always kept very cold by in-

The natural scientist showed that steam emanating from the process of boiling surface water, although its pressure was only .03 atmospheres, the ocean could maintain in the con denser. He claims that the power would equal that which water falling 100 meters could produce and that such power could be derived from the sea in unlimited quantities at the rate of 400,000 kilowatts for

water per second.

The installation of turbines to generate this power would not, Professor Claude asserted, cost more than the installation of those generating from even the most favored waterfalls in the world and would by virtue of torrents of icy water brought from the depths create a cooling force stifling heat and intense humidity of tropical regions. He hoped that the discovery could soon be put to use for the development of France's

Stabilization of Rupee Is Sought Pending Transfer

BOMBAY (Special Correspondence) ture. -The Currency Bill, recently introduced in the Indian Legislative Assembly, in its session at Simla by Sir Basil Blackett, aimed at giving effect to those recommendations of the Royal Commission on Indian Currency and Finance, which relate to the immediate stabilization of the rupee in relation to gold, and to interim measures, pending the bringing into operation of their proposals for the transfer to a Reserve Bank at India of the control of note issues and other functions at present per-formed by the Imperial Bank of

bill for consideration of the House, said it was the first fruits of the report of the Currency Commission.
The Herschell Committee marked the definite end of the monometallic silver standard in India, and since then India had been endeavoring to mittee on international good will of pass over the chasm which divided a silver from a gold standard. But in thickly populated India a sudden break with the past was unthinkable, and the silver rupee remained prac-, of the peace movement in Great Britand the silver rupes remained place tically the sole tender; and it was ain which brought together all the the preponderance of the silver rupes in circulation which was still the further advance. The main obstacle to further advance. The bill gave India what she never had before, a standard definitely linked to gold by statutory enactment. The cry all over India was for stability. all over India was for stability, cry all over India was for stability, of nations are not concerned with and the sooner the exchange rate was Christian ethics. Only the co-operafinally fixed the better for improved tion of all groups who believe that economic conditions all over India, moral precepts should be followed

for agriculture, for industry and for commerce.

Tirubenkata Rangachariar moved that the bill be circulated to elicit fronts us who are working for fronts us who are working fronts us who are public opinion, and in doing so joined

that there was no desire on the part of the Government to force the report on an unwilling House. He, there-

on an unwilling House. He, theretore, agreed to support the motion.
The motion of Mr. Rangachariar
for eliciting public opinion was then
put and carried without a dissentient
voice, and the consideration of the
Currency Bill was postponed.
The Government of India, in a
communiqué, have announced that
they will maintain the exchange at
1s. 6d. until the further consideration of the bill in the Legislature.

### HISTORY TEACHING CHANGE IS URGED

Revision of English and American Textbooks Advised

Special from Monitor Bureau

WASHINGTON-Revision of textbooks used in American and English schools to present a more understanding picture of each country to the students of the other was urged by Miss Lucy Gardner of London, Sir Basil Blackett, in moving the organizer of the conference on the Christian Order in Politics. Economics and Citizenship of 1925, at a luncheon given in her honor by the Washington committee of the Federal Churches.

Miss Gardner outlined the progress

morality in government is the dis-position to make social reforms the Sir Basil Blackett in paying a compliment to the commission for doing their best to serve India. He asked for more time for a detailed study of the bill.

Sir Alexander Muddiman indicated morality in government is the disposition to make social reforms the material for party politics." Miss Gardner declared. "Child welfare, improvement of working conditions, penal reform, should be kept out of the realm of party politics."

A Bonfire in the House

N THE new house there was was something to look forward to, from which they had moved in the glad to have them on as they played early summer. It was not a closet, in the yard.

was the way their father and mother behaved when they had something that would pleasantly surprise is good for," said Jane's and something that would pleasantly surprise is good for," said Jane's and behaved when they had something that would pleasantly surprise Thomas and Jane, and didn't want to tell them till the time came for

the surprise. But there hadn't been anything like it in the house where Thomas and Jane used to live.

"I wonder why it is made of bricks," said Thomas to Jane. "There isn't anything else in the house made of bricks exent the shimmer."

of bricks except the chimney."
"There's a hole in it that goes right
into the chimney," said Thomas.
"And what do you suppose those
iron things are for that stand in it?"

"I gness they're just ornamental," baid Thomas.

"They do something," said Jane.
"I heard Father tell Mother that we'd all enjoy it in the autumn. But I'd "It is," said Jane. "It's a place like to know how we're going to where you can build a bonfire in the enjoy it."
"They're keeping it for a sur-

prise," said Thomas. "So it's going to be somewhat pleasant." So as autumn came nearer there

you enjoy the appetiz-ing and delicious cuisine of the "Old South"; the steaming Hot Breads without which no southern dinner is complete

education in a closer degree of cooperation between the university and
the East of Scotland College of Agriculture. An agreement has been
reached between the university and
the governors of the college to comhine the occupancy of the university
chair in agriculture with that of the
principalship of the college.

Last session Professor Waison, the
occupant of the university chair of
agriculture was appointed to the agricultural chair at Oxford. The
vacancy enabled the university to
appoint the principal, Mr. Shearer of
the College of Agriculture, to the
chair. It was the belief of both the
University authorities and of the college governors that the former would
benefit by being brought into closer
contact with the practical every-day
problems of the agricultural com-

sessions of the eleventh annual con-vention of the National Association of State Auditors, Comptrollers and

Ray P. Chase, of St. Paul, president of the association and State Auditor of Minnesota, emphasized the importance of publicity in the effort to bring about tax reduction. He told of the value of publicity in the effort to bring this about through daily and weekly newspapers and by public speeches. "Don't try to be orators, go out in the country and make the about the taxes."

Joseph Tracy of Columbus, Auditor of Ohio, also advocated more publicity regarding taxes and spoke in behalf of paid publicity agents.

In his address of welcome, John E. Martineau, Governor-Elect of Arkansas, called attention to the fact that Arkansas had discarded its former attitude of placing burdens on capital seeking investment here and that the State welcomed wealth as the medium of greater development.

### Experimental Set Design Subject of Grimes Series

### Results of Logical Research Shown by Inverse **Duplex Inventor**

When David Grimes told us of the reasoning back of his new receiver, we were so impressed with the logical way the idea was worked out, step by step, and the clear way in which Mr. Grimes explained it to us, that see took under consideration the publishing of some articles on this work. It is not merely from the receiver viewpoint that these are interesting, but the fact that many fundamentals of radio are discussed, giving a more or less elementary course in set design with a conventer at and cleaning to the conventer of the conventer of the course of the conventer of the conv less elementary course in set design, with a concrete set and circuits to work from, rather than uninteresting hypothetical cases. The ideas presented should prove of great value to those who like to experiment and design their own receivers. Incidentally, with a course in journalism as a background, Mr. Grimes has the faculty of expressing himself in laymen's terms, which makes his articles very readable.

V. D. H.

Christian Science Monitor covering all phases of the latest developments on the Inverse Duplex System. It L2 (secondary of the first audio to present the recent progress to
Monitor radio readers as the Moniductances are shown in Fig. 2 They ognize the merits of the system back in 1922 and from time to time since then it has kept its readers posted

Inverse Dunley has had an exinteresting career starting back at the time of the war and continuing on through all the rapid stages of development necessitated by the ever-changing conditions of present-day radiocasting. I. D. S. was first worked out as the result demands-demands for the highest radio receiving efficiency reflex" system was considered the conducted showed that it had many over these limitations that several solutions appeared as possibleof which lead to the Inverse Duplex

Some of the defects of reflexing were instability, lack of selectivity, quality, and choking of the tubes before full efficiency was obtained. These various points will be taken up in detail as the series proarticles will really constitute a converse Duplex System involves many Suffice it to say at this point that the Inverse Duplex overcame these troubles and made reflexing obsolete at the close of the war. Reflexing should never have been brought back into use when radiocasting became popular, as its drawbacks were always against it. The Inverse Duplex System, on the other hand, has struggled along through it all, developing and improving its funda-mental idea, until today it is one of the season's best developments and is spoken of, by radio engineers, as of the few new circuit contributions of the year.

The first adaptation of the Inverse Duplex System came in 1922, emoying fixed, or untuned radio-fretransformers, and three ance picked up an this receiver were so remarkable for the four thbes employed that it immediately attracted nation-wide attention. But no sooner had the details of the cirsuit gone out than the number and dower of radiocasting stations greatly increased and the introduction of cone speakers disclosed the fanottomings of ordinary audio-transformer coupling. The fixed radio-frequency transformers were rever made to cover the new radio-day lady 12:45—Boston farmers' produce market report. power of radiocasting stations pever made to cover the new radio-cast band from 200 to 550 meters

r to obtain selectivity. New circuits were therefore tried the I.D.S. combination. Tuned radio frequency was adapted and various types of audio coupling were employed. It was soon apparent that the final Inverse Duplex combination could not possibly be any better than its poorest circuit, but that good circuits throughout would produce oratory thereupon set about to develop the individual circuits with the a of combining them into the Duplex System.

The audio circuit was first apudio coupling thoroughly studied. V transformer coupling had plenty of volume but tended to resonate at certain peak frequencies, causing whistling and distortion. One stage exhibited the familiar distortion. Impedance coupling and resistance gulty, but, of course, did not possess the volume which the transformer combination had. Incidentally, the resistance coupling was found to be undesirable, particularly in the last stage, as it choked up very easily on loud signals.

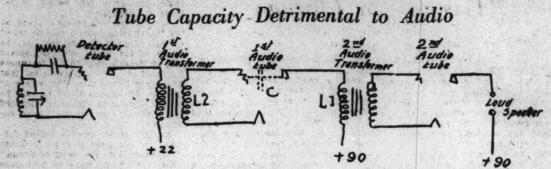

The investigation was concen-trated on the possible causes of the istortion present when two or more stages of transformer coupling were used, because, otherwise, this system appeared to be very satisfactory. An amplification curve was obtained in a certain well-known transformer as shown in Fig. 1. The curve A shows this. Two identical trans-formers were found and when placed n a two-stage audio amplifier should have given an amplification curve durve. But such was not the case, at decided distorted peaks. Apparently these were not in the transformers themselves but appeared when connected in a cascade arrangement. Further investigation discovered the cause. It was an audio feedback

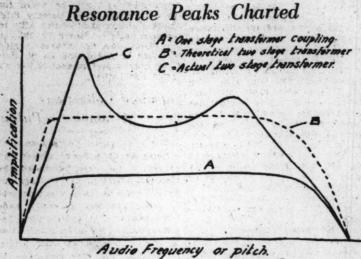

This article constitutes the first in certain tones due to the audio in-special series written for The ductance L1 (primary of the second cuit of the first amplifying tube resonating with the audio inductance is indeed a real privilege to be able transformer) in the grid circuit of

SAINT-GAUDENS FUND SOUGHT CORNISH, N. H., Nov. 17 (Special)—An active campaign is proceeding for the establishment of a maintenance fund for the preservation of the Saint-Gaudens memorial here. The possibility of the Saint-Gaudens estate as a place of inspiration for young sculptors is one of its most appealing features. As funds are forthcoming, it is planned to build in the adjacent woods and groves a group of studio bungalows where young student sculptors may ive, rent free.

Monday night, at a cost of \$50,000 measure now before Congress." It is for its first program, by advertising. the McFadden-Papper bill to re-Half the program's cost went in charter and strengthen banks of the says and a large part of the re-mainder went for rental of 5000 miles of telephone wires connecting the 21

000 receiving sets are within easy by the company, representing a potential audience of 16,000,000 persons. It is planned to extend the system, which now goes as far south as Washington and as far west as Davenport, Ia., further to the south

### PLUG CONTROLS DUAL SPEAKER BALANCING

It has long been recognized that no single loudspeaker of commercial type gives perfect reproduction over the entire musical scale, but tends to amplify some tones more than others. A number of radio fans in search of greatest fidelity of reproduction, therefore, use two speakers, and depend upon their different characteristics to even un-amplification throughout the entire tone range. Several of the highest-priced radio receivers now use a combination such as this with excellent results.

Set owners who have tried the combination of a good cone and a good horn-type speaker, or two hornype speakers with different characteristics, report a marked improve that a single speaker sounds thin home experimenter frequently difficulty in matching the two speakers used, however, for lacking who chooses equipment for this improved postal services. The champarticular purpose, he finds one speaker so much softer than the other one that it cannot be heard at all. This difficulty was he assily car. who chooses equipment for this particular purpose, he finds one all. This difficulty can be easily corrected with the new cord type Centralab Modu-Plug, either by connecting one plug to each speaker so as by connecting a single plug to the louder speaker of the two.

This Modu-Plug is a wo.

This Modu-Plug is a small device that has many ... andy applications where tone volume is required. It is a variable high resistance of special type in a phone plug case, and shunts the speaker in a way to provide gradual control of tone from a whisper to maximum. In the cord type, a phone cord replaces the customary plug connection, and for that reason can be used anywhere in the speaker line without the need

MASONS PLAN CHURCH NIGHTS Masonic church services which were held in the Roslindale district bodies meeting in the Roslindale Masonic Temple, are to be continued this year, starting with next Sunday evening in the Roslindale Baptist Church. Five services are scheduled for this season, to be held on the ending in March. They are to be in the Methodist, Episcopal and Uni-tarian Churches of Roslindale, and later, in West Roxbury. The plan is for special music to be provided for these services each one of which is sponsored by one of the various Masonic bodies in the district, including Prospect Lodge, West Roxbury Lodge, Roslindale Royal Arch Chapter and Roslindale Temple

### RESERVE BANK BILL INDORSED

National Chamber Would Eliminate All "Obsolete Restrictions"

Special from Monitor Bureau WASHINGTON, Nov. 16-Officials of the National Chamber of Com merce have told the President what remove restrictions now imposed on national banks to the advantage of the competitors, the state banks, it is explained.

With "obsolete restrictions" still banks and a still banks are still banks and a still banks are still banks. Federal Reserve System. It would

ooo receiving sets are within easy lange of the territory now covered by the company, representing a potential audience of 16,000,000 persons. It is planned to extend the system, which now goes as far south as Washington and as far west as constitute its compulsory member-ship and its most dependable source of strength. Further with-drawals (of banks) from the Federal Reserve system, on account of the restrictions, threaten the stability of the system."

The recommendation concerning national banks was part of a statement on current economic problems put before Mr. Coolidge by John W O'Leary of Chicago, president of the Chamber, and Robert P. Ellis of Mem-phis, southern vice-president. Sub-jects dealt with ran from govern-mental control of radio to farm prob-

action on radiocasting, to give regulation with as little invasion of private management as possible. Of the two radio bills now before the Con-gressional Joint Conference Commitby the House to that passed by the Senate, because of its greater simplicity. The Senate bill, it is held, would permit competition between Government radio facilities and private companies. This feature is condemned.

The chamber urges speedy ratifica tion of the French debt settlement; asks for the formation of a foreign commerce service, similar consular service but under

Although the figure representing the present purchasing power of the "farm dollar" is relatively low in terms of the pre-war index, many farm problem be approacheed by breaking up the matter into its component. parts for study, by geo-graphical regions, and also by com-modities.

Special from Monitor Bureau NEW YORK-Scholarships for a rear's tuition in the School of neering of New York University have been awarded to 74 students for the year 1926-27, according to an an-nouncement by Charles H. Snow, dean of the university. The scholar-ships, totaling \$15,491, carry either full or part tuition fees, and enable the students either to begin or con-Their renewal depends entirely upon the student's record during the first

your tubes Keep Them in Shape With a Sterling Reactivator

bringing em in If you want to be sure of good radio, keep your tubes freshly energised. Do this at home and save money.

It takes only a few minutes now and then. The result is equivalent to using new tubes. Renew them over and over again. Think of the saving, too. The Sterling Tube Reastivator, emission-meter equipped, tests your tubes and shows you whether reactivation is necessary. It also shows after treatment how vastly improved the tube really is.

Price \$12.50

Or, if you want a lower priced Sterling device—a re-activator minus the meter—but effective, safe and of high quality—we suggest the Sterling "Midget" Tube Reactivator. It costs only \$3.75.

Show this ad to your dealer. If he hasn't Sterling Tube Reactivators in stock he can get one for you.

Write the factory for 32-page book on up-to-date radio devices. THE STERLING MFG. CO. Cleveland, Ohio

# Music of the World—Theatrical News

### "Turandot" at the Metropolitan

By WINTHROP P. TRYON

States, under the musical direc-tion of Tullio Serafin and the scenic direction of Joseph Urban. Metro-politan Opera House, New York, eve-ning of Nov. 16, 1926. The cast: 

accents and fondly-remembered cadences the public heard, when Giacomo Lauri-Volpi, as Prince. como Lauri-Volpi, as Prince, began to signify his desire to attain the ideal, and when Mme. Jeritza, as Princess, proceeded to indicate ob-stacles, in an Italian composer's last opera tonight. For those fervid outopera tonight. For those lervid dut-bursts of the tenor voice, and those vices of pantomine in the manner determined and triumphant chal-of a language, if its pathos is to lenges of the soprano, which char-acterize Pucciri's "Bohème," "Butter-Mme. Attwood was selected. fly," and "Tosca," return in exalted friendliness and familiarity in "Turandot." A problem as old as romance, as old as drama and as old as epic—Don Quixote's, Edipus's and Odvseave's problem states itself in Odyssens's problem—states itself in pure terms of vocal music.

Solo Voices Prevail

All that is said, we may be sure, finds expression through solo voices. The orchestra may be counted out, as being mere accompaniment, though its sonorities are richly and skillfully brought into the scheme. The chorus may be counted out also, only contributing to the accomas only contributing to the accom-paniment; though the field voices are insistently present and are sig-nificantly employed, being uncom-monly suited, no doubt, to that the-atrical order of things known as verism, which the composer in his day peculiarly relished and under-stood. The voices are what we hear and what we recall in his presents aland what we recall in his operas al-ways; mainly a tenor and a soprano, singing in the grand style, and sub-ordinately other voices, high and low, singing according to various smaller, but interesting and appro-

who ever comprehended the mysteries of the vocal rôle better than Pucain? Who ever spoke his thought with surer mastery by means of the vocal rôle than he? In the performance this evening, nobody could help being aware of that unsurpassed power the moment the tenor began taking part in the opening dialogue; nobody could help being altogether conquered by it as soon as the sonobody could help being altogether conquered by it as soon as the soprano began making pronouncements in the scene of the palace steps. For that matter, a listener who could resist the melody of the minor parts—the soprano of Liu, the slave girl, the baritone of Ping, the Emperor's Minister, and the bass of Timur, the wandering King—must have been an enemy of art.

With Puccini, the task was not simply to pick up a dramatic text and turn it into a song, upheld by instruments. That is ordinary musical procedure; and it is the method, obviously enough, of Alfano, who wrote the final duet of "Turandot."

Rather, his purpose was to take with tunes, he must have imagined it as converting the talk of his hero, heroine and subsidiary characters into the actual, tangible stuff of passion; zeal, fury, contempt, resent-ment and mercilessness in darker sort, and mockery, raillery, geniality, kindness and pity in lighter. For this effort, Puccini chose a sub-

ject containing more serious material than he ever picked out before. He went to lore as fundamental as any that Wagner ever sought. Of course the Chinese aspect of the picture is but a gloss and a glitter laid on by a playwright who preceded his col-laborators, Adami and Simone. But the scenic setting in which the Sphinx propounds her riddles mat-ters little. Peking should do as well as Thebes. The thing Puccini seems one of the most impressive passages of modern opera in the enigma aria, or duet, to be precise, of the second act of "Turandot." Here, he succeeds in bringing one of the great folk fables of classic civilization upon his much contemned verist stage; and by means of a soprano voice he interprets it with the convic-tion not only of a Wagner, but even

of a Sophocles.

Which is not the same as saying that "Turandot" is a perfect work in the opera form. At the best, it is an unfinished symphony; for the concluding episode by Alfano ought in all conscience to be dropped. At the worst, it is a drama that reaches a climax in the middle, when the riddles are answered, and the main story is told, and that has no direction thereafter. But of Verdi's "Aïda' almost the same thing may be ob served. Let us not say, then, "Tu-randot," but "In questa Reggia," grand, soprano aria; by the com-poser of "Mi chiamono Mimi," "Un bel di" and "Vissi d'arte."

A Special Audience Held outside the regular series of performances, the première had a special audience. Well for the work, too, that its hearers were assembled of their own accord, instead of at the summons of a subscription schedule. For the play, under these circumstances, could be the And Puccini, though in second-hand fashion, is ever a playwright. Some-body has said that opera will be a general success in America only

New York, Nov. 16 when it is presented and listened to as intelligible drama. Well, "Turperformance in the United States, under the work of the Metalian Condition of the Meta ropolitan management, or quite as reasonably to Puccini's publisers, was put on spiendidly as drama, and it chanced also to be regarded by the

house as drama.

For proof of the first, the piece was perfectly cast. The staircase scene, requiring a heroine of proubearing, soornful aspect and sarcastic address, and a hero of confident demeanor, blithesome countenance and ringing speech, might have been written for Mme. Jeritza and Mr. Lauri-Volpi. The part of Timur wants none of your shouting basses or strutting actors. The finely schooled Mr. Ludikar wa chosen. The part of Liu needs one of those aerial voices that performs like violins, and one of those actresses that not only speak with

words but that use the rarer de-

Broke Into Applause The proof of the second, the audience, at the moment the tenor hears the conditions of the test and walks up to emperor, princess, wise men, ministers, mandarins and people and declares himself ready, broke out into applause. If anything like that has occurred on the night of a Metro-politan production before in the past

10 years, when was it?
To the praise, then, of managers or publishers, the interpretation was brilliant, dramatically, musically and scenically. Mr. Serafin, with baton, showed himself an authentic Puccinist. Those silences in the or-chestra, when the princess asks the riddles, Mr. Serafin made to seem like continuations of the music on another plane than the aural. Those smothered comments in the basses he made to sound like our very own protest against the hero's ordeal. Mr. Urban, in the contours of the stage picture, revealed his notion of per-spective as something that rises in air, instead of extending along the surface of the ground. He reiterated, in the colors, his conviction that what is not red and green in the world is mostly gold and silver. A little guidebook might be written on the symbolism of the scenery, in relation to Turandot's three enigmas.

San Francisco Symphony;

Persinger String Quartet SAN FRANCISCO, Nov. 9 (Special Correspondence)—Taking advantage of his rehearsals of the work late last season, when it was played here for the first time, Alfred Hertz pre-sented Richard Strauss' "Ein Heldenleben" at the second subscription concert of the San Francisco Symphony Orchestra. He made the pro-gram a study in heroism by including in it also Beethoven's "Eroica" Sym-phony.

obviously enough, of Alfano, who wrote the final duet of "Turandot" ment section and the greater range Rather, his purpose was to take spoken words and transmute them into vocalized tone, enlarging their declamatory scope and bringing to In his two most recent performances were excellent in musical conception and good technically. light their emotional implications.

In his two most recent popular concerts Mr. Hertz has arranged prodecorate the verses of his libretiists grams of catholic interest. On one occasion he conducted for the first time his own orchestral arrangement of Five Brahms Waltzes, Op. 39. The composer's style was aptly imitated in scoring, although the pieces are mostly too sketchy for grand instru-mentation. The list that day in-cluded also Beethoven's "Egmont" Overture, Dohnanyi's Suite, Op. 19, Bizet's "Petite" Suite, Delius' "Dance Tales From the Vienna Woods Ernst von Dohnányi is entirely too sober a person and too unmeretri-cious an artist to arouse a fuss about his talent. He is a composer who

Chicago, Nov. 15 CTIVITIES of the Chicago Civic Opera Company in the course ing from effects of dispersal during the summer, but is rapidly regaining not only the most efficient organization of artists the management has yet presented to the public, but a marked and encouraging interest in the operatic proceedings on the part of the public itself. The interpreta-tion of Verdi's "Aida" on the opening night, Nov. 8, already has been given attention in these columns. The fol-lowing evening Wolf-Ferrari's "Jewels of the Madonna" was set forth with Rosa Raisa, Forrest Lamont and Giacomo Rimini as the principal members of an extensive cast. The outstanding impression left by this performance was the superior ability shown in the stage management, par-ticularly in the complicated and crowded details of the opening and

final acts. Mme. Raisa and Mr. La-

ennaro-acted with admirable ar-

tistry and sang with rather less beauty of tone than in previous sea-Puccini's "La Bohème" was the offering on the third evening, Nov. 10. One of the new baritones-Luigi work and his singing and acting in traordinary brilliancy—its climax the part of Marcel raised high hopes plano concerto, in which every oppor- as to his future accomplishments. as to his future accomplishments. The voice of the singer is large and leasant-toned and his ideas concerning characterization are clearly worthy of respect. Edith Mason was the Mimi of the performance and gave real pleasure by the uncommon beauty and finish of her singing. Miss Pavloska, one of the most ver-satile members of the company was an engaging Musette and Antonio Cortis an acceptable Rudolph. Mr. Polacco who conducted brought out nore from the score—as to the or-

> ered from it in the past. "Resurrection" Alfano's "Resurrection" (Nov. 11) was sung with practically the same cast as that which had interpreted it last season. Miss Garden, of course, was the chief attraction, and her reading of the hapless Katinska was as subtle, as highly vitalized and as moving as before. Alfano's music, too, was heard again with enjoyment. It is not, perhaps, remarkably original, but the streaming tunes and the richly colored orchestration are fascinating to the

chestra at least-than had been gath-

A performance of Wagner's "Tristan and Isolde," held Nov. 12, was to any of the previous representa-Wagner pays better in the concert- D as edited and generally transroom than in the theater. Mr. Polacco's reading of the music drama was filled with, beauty and Hallé Concert Season he swept the orchestra to inspired and stirring victories of art. Elsa Alsen made her debut here in the

"Tristan" in Chicago

derstanding how to use it made Miss that in his own works he is su-Vorena's début a considerable success. Luigi Montesanto, the Rigo letto of the cast, renewed the favorable impression which he had made in "La Bohème." He possesses much more than the average baritone's notion of theatrical subtlety and more than the average baritone's power of tone. "Il Trovatore" was the ocasion of another début, for the rôle of Leonora was taken for the first time by Louise Loring, an American vocalist, who sang with skill if not with great histrionic Aroldo Lindi - otherwise power. Harold Lindau-showed, as he had shown previously in "Aïda," that the faith of the management in his powmont + respectively Maliella and ers is well justified. Augusta Lenska's interpretation of Azucena was well within the frame of the highly colored picture which Verdi's librettest offered to the operatic stage, but her voice lacked strength, particularly in the lower and middle ranges.

Symphony Concert

In the first part of its fifth con-Orchestra devoted itself to music stitutes the regular repertory. It be-gan with Bizet's overture, "Patrie," which, if its inspiration lags behind that of "Carmen," is pleasant to hear. Mr. Stock followed the over ture with a first performance in Chicago of Vincent d'Indy's Symphony in D minor—that which the comof Vincent d'Indy's Symphony poser entitled, "Sinfonia brevis de Bello Gallico." The work reflects the profound musicianship and the great earnestness of its author, but ness of thought, it lies on a lower evel than that of the symphony by d'Indy which preceded it by more

Great and well-deserved enthusiasm was evoked by the performance of two concertos by Alfred Wallen-stein, the first violoncellist of the orchestra. A concerto by Jacques Ibert, which came in the opening division of the program, was played for the first time in this country. The music of this piece was clearly written in a vein of irony, and it employed for the accompaniment to the solo instrument an orchestra made up only of woodwind and brass. Ibert, who burlesqued the idiom of the newest French school amusingly, remarkable in several ways, one of did not spare the violoncellist when which was the fact that a smaller cracking his cacophonic jokes, and house assembled to listen to it than Mr. Wallenstein delivered himself of an astonishingly brilliant performtions. This may consolidate the be- ance of his part. Excellent, too, was lief of the opera directorate that his playing of Haydn's Concerto in

mogrified by François Gevaert.

Opens in Manchester MANCHESTER, Eng., Nov. 1 (Spe-Alsen made her debut here in the singing and action of Isolde and she evoked no little admiration for her manner of doing both. Charles Marseason of orchestral music, with an shall, elected to be the exponent of Tristan, made that romantic personage more subdued and more diffident than, surely, ever he had been made before. A finer comprehension of character-interpretation was the King Mark of Alexander Kipnis, who caused that ordinarily tiresome monarch to become a personage of noble and stately pathos.

### Yale University Theater

NEW HAVEN, Conn.—Yale University Theater, the gift of Edward S. Harkness, H. A., '97, of New York City, will be formally opened by a series of five dedicatory performances, to be given on Dec. 10, 11 and 13.

The first performance, Dec. 10, at 8:30 o'clock, is to be Founder's Night, and will be for the corporation and 13.

Prof. George Pierce Baker, chair-Another work that is looked forward to with keen interest is Granville Bantock's "The Song of Songs."

This is a choral work of first-class dimensions, and will be heard for the first time with Dorothy Silk. Frank Mullings and Norman Allin in the solo parts on March 10, 1927. A new Symphony by Ernest Byson methods of the department. Written last year in the advanced work in new Symphony by Ernest Bryson methods of the department. Written will also be heard, and on St. Patrick's Night a performance of Harty's playwriting, it had a successful "tryout" before the audience invited to write all productions of the department. out" before the audience invited to watch all productions of the depart-ment. In accordance with Professor Baker's usage, the members of the of the play. It was revised during the past summer in the light of these nents. In all details, the play will be staged by the students of

tion and officers of Yale University; the deans of the various schools of members of the Yale University Dramrtic Association.

A matinee the following day will be given for all members of the Yale faculty. The third performance, the same evening, will be for the associates in the fine arts; a professors, benefactors, and former members of Professor Baker's "47 Workshop." A matinee on Dec. 13, is to be given for workers in the professional theaters interested in the department of drama. Invita-tions are to be sent out for all per-formances, except for the one to be held on the evening of Dec. 13, seats for which can be obtained at the box office of the University Theater.

### Norma Shearer's New Picture

Special from Monitor Bureau NEW YORK-Capitol Theater. "Un tage," a motion picture based on an original story by Walter de Leon, directed by Monta Bell for Metro-

Goldwyn-Mayer.

Monta Bell has made a neat job genre art of Japan, which reached of "Up Stage." This tale of smalltime vaudevillians comes to the screen with no loose ends or ragged dges, and by virtue of a particularly dramatic climax emerges with a dis-tinct emotional flourish. It is a quiet picture for the most part but giving Norma Shearer full opportunity to shine in that gently radiant way of hers. She firmly characterizes the rôle of the young woman who gets "un-stage" over a fortunate break in her initial theatrical adventure and who finally drops with a salutary thud before it is too late.

In her final scenes, Miss Shearer takes the picture onto a high level of screen drama. With her is Oscar Shaw, more familiarly known on the speaking stage, and giving a sincere though uneventful performance. The other featured members of the cast out, although the ultimate effect of the picture is heavily handicapped by the indifferent photography. It is a pity that more of the remark-

able effects secured last summer on the Metro lot for the Christmas Eve scenec, with the snow swirling through the night air and the holiday crowds bustling through the streets, were not captured by the cameras, for it was one of the most realistic and convincing pieces of studio work that I have ever wit-nessed. But withal, "Upstage" is a nice directorial gesture with a most charming star to give it point. R. F.

Pola Negri is to be starred in 'Vanity Fair," Thackeray's story of Becky Sharp. Erich Pommer will

### "The Unknown Cavalier"

Special from Monitor Bureau NEW YORK—Loew's Forty-second Street Theater, "The Unknown Cavalier," a motion picture adapted from a story by Kenneth Perkins, di-rected by Albert Rogell for First National

"The Unknown Cavalier" is Ken Maynard's second "western" for First National, and he proves his ability to ride and range with the best of the cowboy stars. He and his handsome ing" before the last reel flickers out, covering a wide stretch of especially magnificent desert country in their forts to rout out a notorious bandit known as the Hila Monster, who had been terrorizing the countryside for many years. While the story of "The Unknown Cavalier" follows the gen-eral outline of regulation "westerns," there are plenty of amusing and novel touches tucked into its various reels to give it definite character and

tricks, rescuing his master on one occasion after the Hila Monster had lashed him to a stump in the desert and left him to a lingering fate. Mr. Maynard exhibits his remarkable ability to mount a horse from any angle and to remain mounted under any and all conditions. At one point he does some unusual tandem riding. with four horses abreast. Kathle Collins makes a remarkable attrac-Cavalier's dashing devotions. Mr. Rogell has kept his forces moving clausibly and picturesquely throughout, and the various members of the cast each contribute to the general success of the picture. R. F.

"Up the Line," a Harvard prize play by Henry Fisk Carlton, is announced to open at the Morosco, Theater on Monday night, Nov. 22. The producer is Richard Herndon, and the cast will include Dorothy McCollum and Carlton Macv.

### REVIEWS AND LITERARY NEWS BOOK

### "Victor Hugo, hélas!"

A Review by SAMUEL C. CHEW, Bryn Mawr College

A Review by Samuel C. Chew, Bryn Mawr College

Victor Hugo: The Man and the Poet, by William F. Giese. New York: Lincoln Mac Veagh: The Dial Press. \$4.

RENCH readers (if there should be such) of Professor Giese's formidable and devastating onslaught upon their most illustrious modern poet will probably shrug their shoulders and ask: "But why his own greatness and his own their shoulders and ask: "But why all this bother to prove what we have all known for a long while now?"

"To them the book will read like a belated product of the period about 1890. So belated indeed that it may even meet with some opposition from the most modern of the moderns with whom Victor Hugo, as poet at teast, is coming back into fashion.

That some such reception awaits, or may wait Professor Gless' surveys the various aspects of Hugo's surveys the various aspects of Hugo's vast body of poetry. Especially commendable is the chapter on "Style," while the concluding chapter on "Thought" ends with the terrible vertous heath or lacing his shoes—Hugo nad that Hugo "lacked character, sincerity and purpose; so much so that his reader must regretfully feel, in the presence of this great genius, that he is the poet's moral superior—and not his pupil."

with whom Victor Hugo, as poet at feast, is coming back into fashion.

That some such reception awaits, or may await, Professor Glese's work in France in no way militates against its value to American readers, for the fame of Hugo (at least as novel- joets in their misery dead," exalted is the very with the very of the terrible shadering and purpose; so much so that his reader must regretfully feel, in the presence of this great genius, that his reader must regretfully feel, in the presence of this great genius, and purpose; so much so that his reader must regretfully feel, in the presence of this great genius, and purpose; so much so that his reader must regretfully feel, in the presence of this great genius, and not his pupil."

And yet—there is Professor Glese's own phrase: "this great genius, its value to American readers, for the fame of Hugo (at least as novel- poets in their misery dead," exalted genius. It is it not strangely out of great genius, it is it not strangely out of great genius, it is it not strangely out of great genius. It is the presence of this great genius, it is the presence of this great genius, it is the presence of this great genius. the fame of Hugo (at least as novellest) has endured longer in America than in his own country. The analogous case of Byron's English vs. his continental reputation will average the heaven-inspired leader of men. ntinental reputation will suggest Hugo assumed this function. Yet he

Though "Hernani" is read in our thoughts of a statesman and publischools and "Les Misérables" and cist. His pronouncements upon pub-"Notre-Dame de Paris" perverted lic questions, whether satiric attacks anto film-plays, so thoroughly is hugo discredited as dramatist and hovelist that, as Professor Giese's very title indicates, this new study versal point of view. His satire is ocis limited to a consideration of his casional and ignoble; his exhortar-The point of view adopted Giese declares that he gilds commons not altogether a new one; it sets places with the splendors of style. asked who was the greatest French thought but ne'er so well expressed." The merit lies rather in the extraor- his imagination, in his outlook upon sence of Hugo criticism. dinary force and wit with which Professor Giese rives home his opinions and in the great abundance and aptness of the illustrative pas-sages. It is, in these days, stimulating and refreshing to find a critic who insists upon moral greatness as a necessary element in greatness in any of the arts; but it must be said that this critic carries his insistence too far when it leads him to speak slightingly of so marvelous a poem as "Les Djinns" on the ground that it is a mere metrical tour de force of no intellectual significant of the Seventh Earl of Shaftesbury sudbut he seventh Earl of Shaftesbury sudbut he seventh Earl of Shaftesbury sudbut he seventh Earl of Shaftesbury, and he it was who tour de force of no intellectual significant probably the most illustrious name fought that the said that this critic carries his insistence too far when it leads him to surprising to see a further massive tome on the life work of the Seventh Earl of Shaftesbury sudbut he most illustrious name fought that this critic carries his insistence too far when it leads him to surprising to see a further massive tome on the life work of the Seventh Earl of Shaftesbury, and he it was who

That "the style is the man" is an old saying, and had we no other eviwould be possible to arrive at a fairly accurate estimate. But it happens that we have a great deal of other evidence. No other great writer has left behind him more autobiographical material, and no other autobiographer has distorted his material him to some contemporary. Letters, as the evangelical statesman and in

conviction. He is not content with the better known stories of Hugo's titanic egoism, but gathers together a quantity of less familiar instances. In the main he follows in the footsteps of Edmond Rira who, as Mr. conviction. He is not content with Giese says, "so relentlessly tracked his biographic prey from covert to covert, convicting him at every turn of flagrant falsehood and sordid charlatarry."

These are back to the covert to cover the dense shadow on a sensitive soul."

The actual doings of Shaftesbury hardly need more than recapitulation.

These are harsh terms, but the evidence has long been submitted, the verdict given, and the proces closed. Were the present book written only for the already well-informed this initial chapter at least would be unnecessary; but there are still people who take Hugo at his own valuation as a martyr of liberty, a suffering Prometheus, a great statesman, and an inspired prophet. Such people need to know the truth. The only

A Pattern for a Queen

N THE great library of the ancient castle of Löfstad in Ostrogatha, Sweden, have lain for over 100 stituent Assembly. Extracts from these letters have already appeared in La Revue de Paris, but in this volume they are published for the first time in their entirety, forming

admiration, of compassion for undeserved unhappiness, for suffering valiantly borne—this is what these letters of Fersen to his sister show us on the subject of Marie Antoinette . . . for her he was the knight without fear and without reproach . . the tried friend . . on whose devotion one could count at every light she is regarded by Fersen, "An angel of goodness, a heroine of cour-

Worthy of Admigation angel of goodness, a heroine of courage and deep feeling," he writes of her to his sister. He knew her as a devoted wife to the King, a loving found admiration the Queen's letters most certainly prove. Hers was a fine character, strong, sincere, and most lovable. Again and again with a simple, noble greatness she was willing to listen and act upon the advice of her councilors, if that advice coincided with her highest sense of right; but she was adamant where conscience and reason dictated otherwise. "They must know," she writes on Aug. 7 of the fateful year 1798, "that nothing and nobody can persuade me to follow a course or to adopt an idea which is not dictated by my mind and my reason. . when one is as single-minded as I, and when one's only desire is the public.

This is a book of outstanding significance. Above and beyond its historical and political importance, the tale its pages unfold may be regarded as the record of a life, which is little short of an inspiration. when one's only desire is the public weal, one need fear no one." Fear, indeed, has no place in her heart. She recognized if for what

LIBRARIES BOUGHT

The Kindergarten

THE KINDERGARTEN CHILDREN'S HOUR offers a rich library of the most carefully selected material to help mothers in guiding and instructing their children.

A New Idea in Helps for Mothers

In one volume you will find 135 matchless stories especially adapted for very little children-and such stories are the hardest of all stories to find. Another volume is crammed full of just the right suggestions for games and occupations to answer adequately the cry of "What can we do now, mother?" A third volume tells you how to explain, in a way intensely interesting to your children, the everyday things of life that every child wants to know. C Still another volume contains wonderfully inspiring and helpful advice by one of the world's leading experts upon child training, telling how best to handle children of every temperament on all occasions. G And lastly a volume of 155 songs that children love, together with singing games.

This gives you but a faint idea of the wealth of material in these five volumes.

Simply fill out and mail the coupon below. The postman brings the five volumes to your door. We want you to inspect these books for a week at your leisure, free.

+ + + In that way one can sit year after sion of the author's own times, and a year in the pit or the stall, letting more or less familiar knowledge of smiles mingle with tears; slip behind his own response to the dominant the scenes for a moment and confab note of those times. In fact, how anyone can gather, from the perusal of any work that is worth while, all that book has to give him, without first moved and tickled the world since states and characters which have moved and tickled the world since states and characters which have moved and tickled the world since states and characters which have moved and tickled the world since the tempo of the period about which the author's sympathies lead him to write, is hard to conceive

But this approach and the same of the history, social and otherwise, of the period in which the novel is laid or in which the author lived. Had I never read Carlyle, Victor Hugo or Balzac, I could still have the subtle ridicule of human was the subtle ridicule of human foibles, lacking, perhaps, the effectfoibles, lacking, perhaps, the effect-iveness of that used by Dickens whose tender sympathy and deep un-derstanding of human struggles inspired his readers to a constructive, remedial action. Yet a Thackeray and an Ibsen have their place. One can learn to go from one to the other enjoying each with an understanding heart, and getting the two sides of the picture from the two perspe tives.

So with George Eliot. Herself a critic, detached, yet with the homi-letic perspective, she held up to our view as true a picture of human nature, and with as sure strokes many times, as Shakespeare. We learn to appreciate and take in kindly mood the side-sermons to her read-ers (different indeed from the asides of Dickens and Thackeray) and the frankness of her illustrations.

Nor does one need to approach the tentatively great works of presentday writers in any different manner. Our perspective is necessarily shortened by proximity, and our sympa-thies divided by personal prejudices We find the modern authors as varied in their attitude as were those of the past, but with an inclination, per-haps, to write more of the present, to

row the perspective.
. Dickens experienced much of what beyond it; he never lost his vision. in relation to universal human nathe great writers whose works have lived. I cannot but feel that if each lived I cannot but feel that if each reader can keep a broad enough perspective of his own times, and perceive the point of view of the best writers toward their materials, much keen enjoyment may be found in that literature which our own age is producing, without losing sight of those elements which have made for E. H. H. greatness in the past.

### To Workers All

Written for The Christian Science Monitor O workers of the world, I love you

We clasp kind hands

Across the wide earth's miles.

We toil, my friends, along a common

way
No matter what
The task or distance run.

There is a sweet good cheer that

draws us close In comradeship Along the upward road

strong, Who went before

And lighted well the path. O workers of the world, I love you

Together we Will follow and be glad.

MARTHA M. SMITH.

### Athenian Landscape

The specific quality of Athenian landscape is light—not richness or sublimity or romantic loveliness or grandeur of mountain outline, t luminous beauty, serene exposure to the airs of heaven. . . . The radiance with which it is illuminated has all the clearness and the distinction of the Attic intellect. . . The limestone of Athenian landscape is always ready to take the colours of the air and sun. In noonday it smiles with silvery lustre, fold upon fold of the indented hills and islands melting from the brightness of the sea into the untempered brilliance of the sky. At dawn and sunset the same rocks array themselves with a celestial robe of rainbow-woven hues. . . No country, therefore, could be better fitted for the home of hues. . . No country, therefore, could be better fitted for the home of a race gifted with exquisite sensibilities, in whom humanity should first attain the freedom of self-consciousness in art and thought.—

John Addington Symons, in "Sketches and Studies of Italy and Greece."

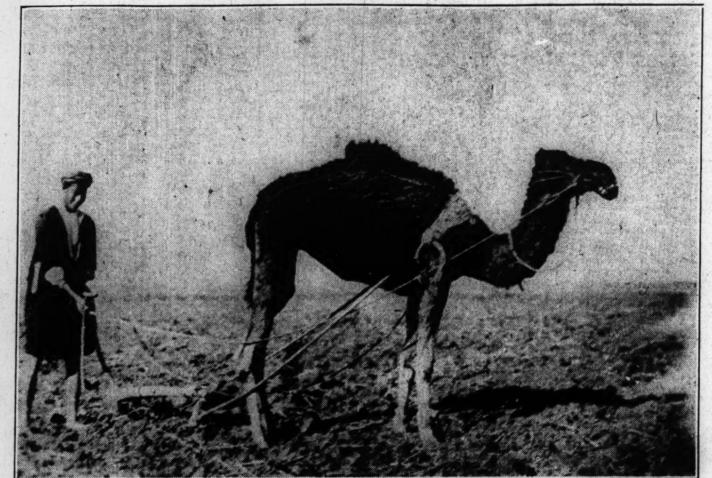

Addington Symons, in shimmering vision wrapped in the silver moonlight of San Miniato.

### MERCANTILE SHARES FIND MANY BUYERS

Some Stocks Are Reactionary, Giving Irregular Tone to Market

NEW YORK, Nov. 17 (P)—Active bidding for mercantile shares in anticipation of large holiday trade marked initial dealings in the stock

marked initial dealings in the stock market today.

S. S. Kresge opened a point higher on a sale of 5000 shares, and Woolworth also was in demand. United States Steel, General Motors and American Locomotive were firm.

Prices of pivotal industrial stocks swayed back and forth in the early dealings, with frequent shifts in the trend of Baddwin, United States Steel and other leaders.

General Motors, however, held to an upward course, carrying with it Mack Trucks and some of the lower priced issues.

Merchandising shares continued to find ready buyers, with May Depart-ment Stores and American Woolen joining the advance led by the chain

Miscellaneous sugar and speculative ssues worked higher, but Crucible Steel, United States Rubber and Case Phreshing Machine turned reactionary.

Demand for Rails Railroad shares were sluggish, pend-ing the appearance of the October earnings reports due within a few

days.

Trading in the foreign exchanges was enlivened by a spurt of 7 points in French francs to 3.43 cents, and a 22-point jump in the Norwegian krone to 25.94 cents. Sterling was unchanged at \$4.84%.

Offerings by the professional element of a few specialties, particularly the chemical issues, Commercial Solvents B dropping 3 points, and American Agricultural Chemical preferred more than 5, fogether with pressure against the Pierce-Arrow shares did not have much effect on sentiment owot have much effect on sentiment owing to a sudden demand for the prin-cipal railroad stocks.

Considerable strength was mant-fested by the sugar group and Radio common and preferred rose to new high prices for the year at 61½ and respectively.

The renewal rate on call loans was onlinued at 5 per cent. Good Demand for Bonds

Indications that the temporary money stringency would soon be relieved opened the way for another buying movement in the bond market today. Foreign obligations resumed their up-ward movement and railroad liens ad-vanced under the leadership of the St.

A renewed demand for French bonds was influenced in part by another vote of confidence for the Poincaré Government and agitation by economic au-horities for speedy stabilization of the ranc. Nearly a dozen of the French ssues scored substantial gains.

Issues scored substantial gains.
Further buying of St. Paul Railway liens was based on prospects that the road's receivership would be lifted before long, provided the sale of the property under foreclosure proceedings goes through on schedule. Average gains of a point or so were established by the company's own bords. age gains of a point or so were established by the company's own bonds, and the Terre Haute income 5s and Great Northern 5s also were strong. Moving counter to the general trend, Buffalo, Rochester & Pittsburgh 4½s were depressed by the adverse report of an Interstate Commerce Commission examiner on the proposed lease of this road to the Delaware & Hudson.

The new Standard Oil debentures, which have not yet been offered, were again in heavy demand, at a price of 102.

The day's new-financing activities were dominated by four public utility issues, aggregating nearly \$35,000,000. Offerings of \$10,000,000 or more for the Western Power Corporation, the Potomac Edison Company and the Public Service Company of Illinois were well received.

# PROFITS LARGE

First Combined Statement Since Merger With Ohio Fuel Issued

The new Columbia Gas & Electric Corporation, organized to give effect to the merger of Columbia Gas & Electric Company and Ohio Fuel Corporation, reports gross earnings of the new Columbia System for the 12 months ended Sept. 30, 1926 of \$91,646,131, while for the first nine months of 1926 these earnings were \$66,858,209.

For the 12 months ended Sept. 30 the first earnings statement issued by the new corporation shows, in addition to the gross already stated, total net earnings and other income of \$34,461,427, after operating expenses, reserves for renewals and replacements and depletion and taxes.

After lease rentals, interest charges and preferred dividends of subsidiaries, net income applicable to dividends on preferred and common stocks of Columbia Gas & Electric Corporation, on the basis that all shares exchangeable therefor have been deposited, amounted to \$25,851,332.

For the nine months ended Sept. 30 this corresponding figure was \$17,332

therefor have been deposited, amounted to \$25,951,322.

For the nine months ended Sept. 30 this corresponding figure was \$17,332,-347. Annual dividend requirements on \$15,848 shares of 6 per cent preferred stock issuable total \$5,711,088.

The size and strength of the consolidated property is otherwise revealed for the first time in the balance sheet which shows total assets in excess of \$483,000,000; current and working assets of over \$27,750,000 as compared with less than \$20,000,000 of current and accrued liabilities: funded debt of \$58,080,000, stock capitalization of approximately \$213,000,000, reserves of more than \$120,000,000, and surplus of \$68,000,000.

So far as the merger of the two companies is concerned, the figures show it to be the largest transaction of the kind in the history of the industry. Incidentally to this amalgamation, it is stated that all the assets and business of Ohio Fuel Corporation have been acquired, practically 98 per cent of the Ohio Fuel stock having been deposited with the committee, whils more than \$3 per cent of the common stock and over 77 per cent of the preferred stock of Columbia Gas & Electric Company were acquired by the new corporation.

### FLORENCE STOVE CO. OF GARDNER, MASS.,

Occasionally a bright spot appears on the New England business horizon which serves to prove that the usual rewards of well directed manufactur-ing and selling effort can be collected

Florence Stove Company of Gardner, Mass. This compact little company, which dates back to 1875, makes oil cook stoves, oil heaters, etc., and is successfully coping in domestic and foreign fields with rather formidable compactition.

foreign fields with rather formidable competition.

In the fiscal year ending Aug. 31, 1926, the company earned after all charges \$580,321. Allowing \$46,187 for a year's dividends on the 7½ per cent preferred stock, the balance of \$550,133 was equal to \$91.70 a share on the \$600,000 stock of \$100 par.

At the end of its fiscal year the company had current assets of \$1.586,658

pany had current assets of \$1,586,658 and owed nothing except current ac-counts payable and taxes of \$148,147. leaving a net working capital of \$1.-438,511. Working capital is half again as large as the stock capitalization.

### RECORD CHAIN STORE SALES IN 10 MONTHS

October sales of the 10 leading chain atore companies aggregated \$60,081,-701, an increase of \$5,205,851 or 9.48 per cent, compared with the total of \$5,475,850 reported for the same

month last year.

A new high record for chain store sales for any 10 months' period in the history of the United States was established when sales of the 10 leading chain stores aggregated \$454,838,-240 for the 10 months' period ended Oct. 31, 1926. This total compared with \$402,401,634 reported in the similar period in 1925, shows an increase of \$52,236,606 or 12.5 per cent.

With an increase of \$17,756,687 in sales in 1926 over the first 10 months of 1925, the J. C. Penney Company led all other stores from the standpoint of dollar gain, while Neisner Bros., Inc., one of the smaller organizations, with an increase of 61.3 per cent, reported the largest percentage gain for the period.

F. W. Woolworth Stores showed the largest dollar gain for the month of October over October, 1925, an increase of \$1,825,097. Neisner Bros., Inc., led in the percentage gain for the month, with an increase of \$5.5 per cent.

in the percentage gain for the mon with an increase of 68.5 per cent.

# WHEAT PRICES ARE

CHICAGO, Nov. 17 (P)—Assertions that above an average crop may be looked for in Argentina tended to weaken wheat values early today. One leading authority cabled raising by 4,000,000 bushels his previous estimate of a probable Argentina wheat yield.

Opening unchanged to 1½ lower, wheat submequently underwant.

y up, and later scoring a declare general advance.
Opening prices today were: Wheat—
Dec. 1.34, May 1.38½, July 1.32. Corn
—Dec. 63%, May 78½, July 81½. Oats
—Dec. 41½, May 45%, July 45.

per cent was also declared on the preferred, payable Dec. 1 to stock of record
Nov. 20.

MERGENTHALER PAYS EXTRA NEW YORK. Nov. 17—Mergenthaler Linotype Company declared a 25 cents extra dividend, also the regular quar-terly of \$1.25 on the common, both pay-able Dec. 31 to stock of record Dec. 4.

How to tell the difference

OME investors mistakenly assume that all real estate bonds are simply old-fashioned mortgages in modern form. Some of them are, but not all. And it is the old-fashioned mortgage, of course, which has earned the reputation of being just about the safest investment that money can buy.

BETWEEN THE OLD-FASHIONED MORTGAGE

The type of mortgage into which so many generations of conservative in-vestors have placed their savings has several characteristics not present in it represents a loan of only a few thousand dollars, usually on a resi-dence, invariably on a completed property, and only for approximately half the value of the property.

All of the mortgages securing Real Estate Bonds offered by The Balti-more Trust Company are of this old-fashioned type. The mortgages aver-age less than \$5,000 in amount and less than 50% of the value of the prop-erties. Most of the properties are in-dividual residences; all are completed. The Baltimore Trust Company ex-cludes from its offerings the new type

of bond now widely issued to finance the construction of buildings to be erected at some time in the future— large, single-use structures, such as apartments, botels, theaters, office buildings, etc. Mortgages on such properties are not old-fashioned mort-cases in the sense in which that term properties are not old-fashioned mort-ages in the sense in which that term is generally understood by banks, insurance companies, lawyers and individual investors.

The 300 National Banks, State Banks and Savings Banks, and the thousands of individual investors who have purchased Real Estate Bonds offered by The Baltimore Trust Company, have all the protection of the old-fashioned mortgage, to which has been added the guarantee of principal and

### FREIGHT LOADINGS IN NINE MONTHS SHOW BIG GAINS

NEW YORK, Nov. 17 (P)—An increase in freight loadings of 1,827,21,4 810 cars in the first nine months of
25,5 this year was reported by the car
service division of the American Railway Association at the directors' meeting today.

ing today.

A total of 45,257,913 cars were loaded, according to the report. This was an increase of 1,827,810 cars, or 184 18 period of 1925. The 1925 loadings were the record, and represented an in-crease of 4,100,539 cars, or 10 per cent, over the similar period of 1924. over the similar period of 1924.

Predicted loadings for the year were set at 52,700,939 cars, a 3 per cent

7 increase over 1925. Although handling 16½ a record tonnage, the railroads have 19 not been under strain, the report stated, 4200 serviceable locomotives 18% being reported in storage. WASHINGTON, Nov. 17—Loadings of revenue freight for the week ended Nov. 6 totaled 1,137,210 cars, according to American Railway Association This was an increase of 74,564 cars over the corresponding week last yearland an increase of 141,931 cars over the corresponding week in 1924.

Ahumada Lead Company reports for the nine months ended Sept. 30, 1926, net of \$827.617 after depreciation, taxes, etc., equivalent to 69 cents a share (par \$1) on 1.192.018 shares, compared with \$1,260,-232 or \$1.05 a share in the similar period of 1925. Net for the third quarter of 1926 was \$230.094 after above charges, equal to 19 cents a share, in the preceding quarter, and \$497.503 or 41 cents a share in the third quarter of 1925.

LONDON, Nov. 17-The stock market was easier today, with trading restricted by the approach of the carryover period. Industrials were under

Bradford Buying Heavier-River Plate Market Quiet -Sydney Prices Strong

While there is no pronounced price trend in the wool market, there is no gainsaying the fact that sentiment of the wool trade is much more optimistic than it was a week or 10 days ago. With the settlement of the English coal strike, and active production restablished in the English coal mines forthwith, the penalty of lack of power at the mills which has held up production in Yorkshire will thereby be removed.

emoved.

The effect upon Bradford has been acticeable already in increased buying of wool in the primary markets of the Southern Hemisphere, and notably in

Recently, it appears that substantial weights of tops have been sold in Bradford for delivery after the turn of the year, on the basis of 44@45d for average 64s, and about 46d for super warp descriptions.

Bradford Sales Growing

While Bradford is buying chiefly merinos in the Australian markets, it is significant that they are operating newhat freely in crossbreds also, as wn at the opening of the New Zea-d season in Wellington on Monday, land season in Wellington on Monday, which inaugurated the season in the Dominion. At this first sale there were offered some 9000 bales, and rather better than 90 per cent of the offering was sold. The selection was unusually good and competition for the most part was animated.

part was animated.

Prices, figured out on a clean basis, landed in bond at Boston, varied from 51@53c for 50s; 49@51c for 48-50s; 44@45c for 46-48s; 42@43c for 44-46s; 40c for 40-44s, and about 38c for 36-40s, taking exchange at \$4.86, all for super wools. Napler will offer in the next sale on Saturday 15,000 bales.

Quiet at River Plate
Offerings from the River Plate markets the last week have indicated little change in the situation there. Toward the end of the week, prices showed a little more strength. England and Germany have been buying a fair weight of wool, considering the offerings available in Montevideo and Buenos Aires, while America has been taking some wool of the better types. Prices are about where they were a week ago, with Montevideo 58@60s quotable at 40@42 cents; 56s at about 29 cents; 50s at 34@36 cents; IIIs at 32@32 cents; IVs at 28½@29 cents and Vs at 26@27½ cents, cost and freight, in bond, according to the packing.

Greight, in bond, according to the packing.

Quotations from Buenos Airas are limited chiefly to fours and fives, which are quoted by different houses from 23 to 24½ cents on the lower quality, and from 25 to 26½ cents on the higher quality for super skirted and rewound wools, in bond, here, on a cost and fseight basis.

At the Cape, the market has been moderately active. Prices are generally steady. For the best \$4@70s super combing 12 months' wools, prices paid are reported to be about equivalent to 95 cents, clean basis, in bond, at Boston, while average wools are costing around 90 cents, clean basis, landed here, and choice 10 to 12 months wools around 86@88 cents.

Australian Market Firm

Australian Market Firm Australian markets closed last week very firm, with good clearances in all centers. The offering at Melbourne was quite an ordinary one, but the best wools were costing around \$1 for 64-70s and the best 64s about 95c, while in the Geelong sale, Thursday, prices for the choicest 64-70s combing, wools touched \$1.03, clean basis, in bond landed Boston.

The best super 64s warp wools were

It is because there are accumulations in arrears.

### EFFECTS OF NEW FINANCING BY STANDARD OII

NEW YORK, Nov. 17-As a result NEW YORK, Nov. 17—As a result of the financing in connection with retirement of its \$199,972,900 of 7 per cent preferred, Standard Oil of New Jersey will be able to pay \$1.16 annually on its common without affective.

than by payment of \$1 in the present status.

If the 12½ cents extra just declared were made semiannual so that stock holders would receive \$1.25 annually, the company would have to cut into surplus after dividends to the extent of \$2,127,519 more than in the present status. If the 12½ cent extra were paid quarterly, making the annual dividend \$1.50, there would be \$6,036,305 more added to annual disbursements.

The preferred once retired, there will be saved for surplus the annual dividends of \$13,998,103. As the \$120,000,000 debenture issue will require \$6,000,000 annual interest, it will reduce taxable income by that much. With the federal tax rate 13½ per cent on corperation income, this will mean a saving of \$\$10,000, making total saving \$14,808,103.

Against this are the following new disbursements: \$6,000,000 interest and \$3,449,317 dividends of \$1 annually on the additional common to be sold to stockholders, a total of \$3,449,317. There is also \$1,450,000 approximate loss in interest at 5 per cent on the \$20,000,000 Treasury funds needed to complete retirement of the preferred. The total of new disbursements and loss in interest as computed above is \$10,899,317, which is \$3,908,755 less than the \$14,808,103 saving. This difference is 16 cents a share on the \$4,215 shares to be outstanding after the new stock issue.

DOUGLAS PECTIN PAYS EXTRA

DOUGLAS PECTIN PAYS BYTRA NEW YORK, Nov. 17—Douglas Pactin declared an extra dividend of 80 cents and the regular quarterly of 59 cents both payable Dec. 21 to stock of record Dec. 1. This is the same as was paid three months ago.

NEW YORK CENTRAL NEW YORK, Nov. 17(5)—Unconfirmed reports are being circulated in Wall Street that the management of the New York Central Railroad might segregate the company's realty holdings which are enormously valuable.

# CANADA GOOD

sion-Paper and Steel

tail stocks generally are not over plentiful.

The textile companies are said to have been prepared for the recent. slump in cotton prices, and are in a good position to take wantage of any new business offering. With the advancing season, there is some improvement in orders for furs, and business in this line is said to be ahead of last

gear.

Brisk hardware sales are reported, and with the Christmas season fast approaching, dealers expect to do a very heavy volume of business during the remainder of the year. Many New Projects

Rumors are current of numerous new developments to take place early next year, which will have a beneficial effect on manufacturing industries. New equipment and materials for mines, hydro-electric plants, proposed office buildings in Montreal, Toronto and other cities are some of the

projects mooted.

It is reported that the collieries at Sydney, N. S., are fairly busy at present. Manufacturers of paints, varnishes, etc., intimate that orders are already coming in fairly well for spring delivery.

The Dominion Bureau of Statistics estimates the total yield of wheat for this year at 405,814,000 bushels, as compared with 411,375,000 bushels a year ago. The total yield of oats is estimated provisionally at 364,777,000 bushels, compared with 513,384,000 last year. The total yields of other principal grain crops are estimated provisionally as follows, with last year's final estimate in parentheses:

cations are steady.

### CUSTOMS RULINGS

TULSA. Okla., Nov. 17 (P)—The expected cut in the price of Midcontinent Crude Oil came today with the announcement of the Prairie Oil & Gas Company and the Sinclair Oil Company that they had met the reductions posted by the Carter Oil Company. The Carter cut 15 cents for 28 gravity oil to an 87-cent reduction on top grade oil.

NEW YORK, Nov. 17 (Special)—Sustaining protests of the John V. Farwell Company, Chicago, the United States Customs Court rules that certain hands rechiefs in part of lace should have been taxed with duty at 75 per cent ad valorem under paragraph 1436, tariff act of 1922, as embroidered articles, and not at 90 per cent under the same paragraph, as articles made in part of lace, as assessed by the collector.

In overruling protests of Meakin & Ridgway, the court finds that certain merchandise, invoiced as "plain ivory Blenheim," and reported by the appraiser to consist of tinted earthenware, was oprected as seen as was correctly assessed with duty at the rate of 50 per cent ad valorem under paragraph 111, tariff act of 1922. The importer contended for duty at only 45 per cent ad valorem under the same paragraph, which contention is denied.

Method of Distribution

"The only thing I dread as a buyer is a high-powered salesman, selling me by, brute force something I do not need. I am afraid of that man and my buyer's defensive is almost impregnable.

"But the man who comes in to me and evinces an intelligent interest in what I am trying to do, who then interprets his product in the terms of my desires and policies and plansthat man wins my honest respect and hearing. I am willing to help him sell me if he can intelligently.

"Now, this is rather-straight from the shoulder, but it is not said in a critical way. I hope it is constructive. I know it is true, and certainly if the salesmen of the country would unite in forcing the buyer to buy according to a policy or plan, they would find better buyers, more intelligent buyers, more liberal buyers. They would get an intelligent and adamant 'No,' when it was due them, and would be enabled to spend every real selling dollar on true prospects rather than frittering away their time on individuals who operate by hunch and by guess." BONDS

SEASONAL DEOP IN AUTO SALES by guess."

WESTN. POWER COEP. FINANCING
Peircs, Fair & Co., Blyth, Witter & Co. and E. H. Rollins & Sons have purchased and are making public offering of a new issue of \$10,000,000 Western Power Corporation. Series A. 5½ per cent convertible collateral trust gold bonds, dated Dec. 1, 1926, due Jan. 1, 1987.

SEASONAL DROF IN AUTO SALES
The seasonal decline in automobile asies is reflected in the October report of General Motors Corporation showing pared with 116,224 the month before, but this year were 49 per cent greater than in the similar period last year, 1,061,365 compared with 116,376. Sales to dealers were 57 per cent larger.

Following their 4-to-1 victory over Canadiens of Montreal last night, the toston Bruins take the 3 o'clock train

Boston Bruins take the 3 o'clock train this afternoon to Detroit, where they play in the Windsor rink, Windsor. Ont., tomorrow night against the Detroit sextet, managed by Arthur Duncan and composed of practically the entire Victoria Cougar team of the now defunct Western Hockey League. The Bruin victory last night was indeed an auspicious opening for its third season of professional hockey. The locals displayed vast improvement over their playing strength of last year, mainly through the added power of the new players. Although Cooper scored three of the four goals, the western players now with Boston figured prominently in two of the team's total goals.

Hainsworth, Canadiens' new goalie Hainsworth, Canadiens' new goalie, had a keen eye for stopping shots, but his late and indifferent manner of clearing brought upon himself far too many precarious situations. The locals needed only minutes to fathom Hainsworth's apparent weakness.

The game also served as a criterion of a difficulty almost certain to be a problem to professional hockey. It

problem to professional hockey. It was the first game of the season and much unnecessary roughness crept in in very short order. Referee Dr. J. W. Laflamme of Toronto had many pen-alties to inflict and might have issued as many more had he been inclined to retard the game from a spectator's

The first period was scoreless, but not without action. Canadiens played the Bruins on even terms and their showing indicated that, in their divi-sion, they will stand an excellent chance of winning first honors for the

The second session found the puck in the net for the first time. Galbraith, Boston's new left wing from Eveieth, took a shot from the left lane which rebounded from a Canadlen player to his stick again. Then he tried another his stick again. Then he tried another shot, but merely pushed the puck ahead and when he recovered he was clear of the Canadien defense and picked his corner by Hainsworth. Hitchman took a long shot less than a minute later and Cooper swooped in for the rebound and scored. Morenz scored the visitors' lone goal after bumping and stumbling through the local defense in his characteristic style. A Bruin was off the ice at the time.

A Bruin was off the ice at the time. The third session found a mingling of good and bad hockey with an abunlance of roughness prevailing. Cooper added his second and third goals, the added his second and third goals, the first coming by a drive which passed under Hainsworth's arm and rebounded so quickly from the back strings that Canadiens questioned the legality of it. His third score was the result of the best piece of teamwork of the evening. Shore, new defense star from the West, carried and passed to Galbrailth on his left who snapped the puck over to Cooper on the right and the last named shot the goal.

Galbraith and Shore stood out for the newcomers of the Bruins and Stewart, local goalie, played faultlessly. Herberts has not reached his peak yet. Morenz and Gagne featured for Canadiens.

BOSTON

CANADIENS

Worters.

The game was fast but neither team displayed any real hockey form. The Pittsburgh players passed poorly and shot repeatedly without direction.

Captain Burch, the American's star center, played an excellent game. He stopped Drury and Conacher repeatedly. The Americans resorted to defensive play during the final period and held off the Pirate rushes successfully. The summary

York Hangers, the team which is making its first appearance as the home
team of the New Madison Square Garden, scored a brilliant victory last night
in the initial contest of the National
Hockey League, when they defeated
the Montreal Maroons, 1926 champions,
1 to 0.

### Sargent Names Big Four in Golf

Taylor, Vardon, Travers and Hagen Main Contributors to the Game

NEW YORK, Nov. 17 (4)—The four outstanding contributors to the game of golf, in the opinion of George Sargent, retiring head of the Professional Golfers' Association, are J. H. Taylor, Harry Vardon, Walter J. Trayers, and Walter C. Hagen.

The man who in six successive terms as president developed the professional organization to its present powerful position, explains his opinion as follows

organization to its present powerful position, explains his opinion as follows

Taylor, an Englishman, and runner up to his fellow-countryman, Vardon, in the open championship in 1900, introduced the methods of approach universally used by all good golfers today. Then Vardon gave the game the upright swing. Travis, amateur champion in 1900, 1901, and 1903, brought the game from the fairways to the greens with an emphasis on putting.

Hagen, United States professional champion for the past three seasons, found nothing left in the way of mechanics to improve upon, so he adopted the attitude of playing the game always the same regardless of how things were going. That, Mr. Sargent believes, is nine-tenths of Hagen's stock in trade and the real reason for his remarkable success on the links.

Great Britain's challenge for an international golf match between professional teams in the United States next July was accepted yesterday by the Professional Golfers' Association.

Tentative plans call for the match to be staged on a course in the Boston district prior to the open championship at Oakmont Country Club, Oakmont, Pa. It will be a return meeting, an American team headed by Walter C. Hagen having been defeated on British links last summer.

In its message of acceptance, the Association will stipulate similar playing conditions to those which prevailed in the initial clash overseas. Two days of play between eight-man teams will be asked, one for individual

Two days of play between eight-man teams will be asked, one for individual matches at 36 holes, the other for four-ball matches over the same dis-

New membership regulations adopted yesterday require prospective appli-cants to serve three years as caddie masters, assistant professionals or instructors before becoming eligible to

### WAMBSGANSS RELEASED

game lacked teamwork, most-of the tries for goal being made by individual efforts, with the exception of the single goal scored. Another element that told against teamwork was the frequent substitutions, both teams trying out various combinations all through the game.

Fred Cook really displayed better form than his more famous brother, Capit. William Cook of the Rangers. Not until late in the second period were the brothers able to break through the iron-clad defense of Montreal, with Benedict a tower of strength in goal for the Marcons.

With 1½ minutes to go in the second period, William Cook carried the puck down the ice, and, though Benedict turned away the first shot, it went to F. Cook, who sent it back to his brother, and the latter scored an easy goal, as Benedict was out of commission as the result of his first try.

WAMBSGANSS RELEASED

WHILADELPHIA, Pa., Nov. 17 (P)—William A. Wambsganss, veteran infedier, was yesterday given his unconditional release by Connie Mack, manager of the Philadelphia American League Baseball Club. He came to the Athletics after the close of the 1925 season from the Boston Americans. He has the unique distinction of being the only piayer to make an unassisted triple play in a World series, accomplishing the feat as a member of the Cleveland team against the Brooklyn Nationals in 1920. Wambsganss started his majorileague career in 1914 with Cleveland. He became a major leaguer through his fielding ability, for in only one of his 13 seasons in the majors has he hit above 300. He did, however, have the reputation of being a good man in the pinch at bat,

BROOKERS.

MONTEFAL.

PASADENA, Calif., Nov. 17 (#)—University of Alabama and Leiand Stanford University have been chosen as the football teams to meet in the annual New Year's Day game at the Tournament of Roses in the Bowl here, it was authoritatively reported yesterday in tournament circles.

### "BIG TEN" FOOTBALL RACE REACHES A GRAND CLIMAX

Five Conference Games Bring the Championship to a Close This Week-end-Northwestern and Michigan Only Two Teams Undefeated

INTERCOLLEGIATE CONPERENCE and they have only the desire to kee their Conference slate clean to key

CHICAGO, Nov. 17-With five Con-CHICAGO, Nov. 17—With five Conference games scheduled, the football championship race of the Intercollegiate Conference rises to a grand climars and conclusion this Saturday. Two undefeated teams remain, and Northwestern University has a better chance of going through undefeated than University of Michigan, though some consider the latter to be a better balanced eleven. Northwestern invades University of Iowa, whose team has lost four games, while Michigan has lost four games, while Michigan invades University of Minnesota, which has been gaining tremendous power. In another important battle, Ohio State University faces University of Illinois at Champaign. Both teams are among the strongest in the circuit, though each has lost to Michigan. Indiana University invades Purdue University in an engagement at Lafayette that should settle the Hoosier section champingship of the loss. In the 4fth. championship of the loop. In the fifth contest, University of Wisconsin appears at Stagg Field here against University of Chicago. Indications are that each contest will draw a capacity

Victory in the Iowa game this Sat urday will give Northwestern the first perfect Conference season in its his-tory. Coach G. F. Thistlethwaite in fory. Coach G. F. Thistlethwaite in five years has brought the Wildcats to the top of the Conference, and last week they achieved the greatest tri-umph of their season, a 33-to-7 vic-tory over Chicago, which had not been beaten by the Purple in 10 years. It is safe to say that Iowa will guard against V. W. Gustafson '28, star half-back extine. against V. W. Gustafson '28, star half-back, getting away for another 90-yard touchdown run from the initial kickoff as he did against Chicago. Gustafson starts with a lot of sudden power. He contributed three touchdowns in this game, snapping away to shifty goal runs after receiving forward passes.

Passing Improved

Northwestern's passing was greatly improved over previous games, as the players shot quick passes that none but intended receivers could possibly reach. Iowa will have to look out for one from R. C. Baker '27, halfback, to Gustafson, such as scored the second touchdown against Chicago. Baker received from the center only five yards behind the line. He got the ball high on his right shoulder and hardly had time to get his hand on it when he shot it to Gustafson, who was planted wide on the scrimmage line. The speed of this pass makes it difficult to stop. Passing Improved

planted wide on the scrimmage line. The speed of this pass makes it difficult to stop.

Unless Iowa takes a decided turn it will not be able to check the powerful Nicolate Machine. The Hawkeyes were defeated again last week, losing 20 to 10 to Wisconsin. Coach B. E. Ingwerson has a heavy team that does not seem active enough to keep up with "Big Ten" pace. Only N. A. Kutsch 28, halfback, appears able to show congistently. The Hawkeyes proved especially vulnerable to the Badger overhead attack and Northwestern may be able to get through by the same avenue.

While Michigan defeated Minnesota 20 to 0 in their previous meeting this season, there is no certainty that the Wolverines will repeat despite their brilliant 17-to-16 victory over Ohio State before 90,000 spectators at Columbus last Saturday. The Gophers have realized their power in recent games, last week running up an 81-to-0 count on Butler University at Minneapolis. The Gophers are taking of the plunging power of the strong and may games that it can full advantage of the plunging power of the strong and may games that it can full advantage of the plunging power of the strong and university of minstering stated slightly over Indiana, as it has made a brilliant show:

# Yale Olympic Crew

Prof G. H. Nettleton Knows Nothing About Entering 1928 Games

Future Will Decide

NEW HAVEN, Conn., Nov. 17 (49)—Participation of a Yale crew in the Olympic games in 1928 is a matter for future decision and a question which has not come before the Yale Athletic Association, it was stated at the University today. Prof. G. H. Nettleton, chairman of the board of athletic control of the association, said he knew nothing of the matter.

Harold F. Woodcock, general manager of the athletic association, said that as no thought had been given to sending a Yale crew abroad in 1928, there had been no consideration of a training place. "Moreover," he said, "1928 is a long ways off, and the decision as to sending a Yale crew abroad might rest primarily on whether Yale in 1928 had a crew which was regarded as a representative one."

Mr. Woodcock said that during the past summer a German crew at Hamburg sent an invitation to Yale to send a representative crew there in 1927, to participate in races. The invitation was declined with regret, with the explanation that the university was not

knew, this was the only recent mem tion made of the Olympics in connec ion with a Yale crew.

WASHINGTON, Nov. 17 (4)-The Olympic Games at Amsterdam in 1928, Gen. Charles H. Sherrill, American member of the International Olympic Committee, told the meeting of the American Olympic Association.

American Olympic Association.
Yale's crew carried the American
colors to victory in the 1924 Olympic
championship at Paris.
General Sherrill also told the assoclation it had been decided to hold the
Olympic track and field program at
Amsterdam over a two weeks' period
beginning July 14. The rowing events
are scheduled to start July 17.

### TWO GAMES FOR DRAKE REMAIN

Faces Notre Dame and Grinnell, a Traditional Footan easy game last week and should be primed for the greatest effort of their season. They also have the motive of evening the count with Michigan. They are faced with stopping the varied attack directed by Benjamin Friedman 27, Michigan quarterback, which proved their undoing earlier and which told against Ohio State last week. The Gephers have nobody to match Friedman at field goal and after-point kicking, assets which have turned more than one game Michiganway, including that of last Saturday.

Purdue Favorite ball Rival

P. & A. Protos

F. I. PETERS /29

DES MOINES, Ia. (Special Correondence)—Going through a schedule eight difficult games, the Drake niversity football team has rounded into a fast, aggressive squad for its final engagements. While it was set back by University of Nebraska, United States Naval Academy, University of Oklahoma and Iowa State College, it rallied to defeat University of Mississippi and University of Kansas on the home gridfron.
On Nov. 13 Drake met Iowa State for the twenty-sixth time and lost by a 13-to-7 score. In the 25 previous

and their greenness cost the Bulldogs several opportunities to score in the early games. With the experience gained in the recent games, the line improved. They charge better. They held Mississippi and Kansas elevens to a few first downs.

That Drake will end the campaign with a troops for the literal propers several temporary and the campaign with a troops for the literal propers as That Drake will end the campaign with a strong football team appears as7 sured. L. M. Jones '29, playing his first year on the varsity, is rated one of the best guards in the Conference. C. L. Simpson '29 is a strong center, having displaced C. J. Johanssen '29, who did not return this year. C. E. Delmage '29, playing left end, has played a steller game all season and is considered a likely candidate for the mythical All0 Valley team. R. B. Helser '29, playing at left tackle, shows much promise. R. F. Anderson '29 and A. M. Nevens Jr. '29 are likely looking reserves, and Jr. '29 are likely looking reserves, and

should be regulars next year. Three Backs to Graduate

In the backfield Everett, quarter-back, J. D. Dustin '27 and W. B. Sutherland '27 will be lost by graduation. Capt. G. L. Fry '27, will also become ineligible at the close of this semester. Returning next year will be W. A. Cook '28, fullback; A. J. Johnson '28, W. B. Meyers '29 and E. G. Beebe '29, around which Coach Solem can build a great backfield. Drake plays Nov. 20 at South Bend, where it meets University of Notre Dame as the feature attraction of the Notre Dame homecoming.

On Thanksgiving Day the season will be brought to a close here with Grinnell College, a traditional rival of Drake's. The Pioneers have a goed team this year, having yet to meet with a defeat, although their record is marred by a tie game with Ames. This game should prove a thriller and the entire seating capacity of the huge new Drake stadium is expected to be sold.

If the team can break even in games Three Backs to Graduate

If the team can break even in games won and lost it will be considered suc-cessful by all those concerned here. The schedule is perhaps one of the hardest faced by any team in the Val-

### SOUTHERN RACE FACES A CALM

Many Football Teams to Be Idle This Week-End-

Washington & Lee
Virginia M. I.
Fulane
Louislana State
Missistrappi

nce)-The past week in Southern in the habit of permitting its crews to go on long journeys, although in the past it had not been adverse to allowing a crew to go to the Olympics, which come once in four years.

Mr. Woodcock said that so far as he man the spectacular victory of University of Georgia over Georgia School of Technology. Many other games of im-Conference football was featured by feated University of Tennessee team and the spectacular victory of University of Georgia over Georgia School of Technology. Many other games of importance were played, but interest was centered mainly in these two events.

University of Tennessee, with four Conference victories previous to last Saturday, was conceded by many critics to have an even chance to win from Vanderbilt, with a strong possibility of finishing the season undefeated. Vanderbilt's driving attack, however, was too much for Tennessee, and the 20 to 3 victory was a well-earned one. The work of Quarterback W. D. Spears '29, was again brilliant, giving him a record for consistency in his four major Conference games that will place him far in the lead in selection of "All-Conference" players. The loss of this game removed another team from the championship possibilities, but it still leaves Tennessee on an equal basis with Vanderbilt and University of Georgia with four victories and one defeat in five Conference engagements.

University of Georgia defeated

tories and one defeat in five Conference engagements.
University of Georgia defeated Georgia Tech in as thrilling a battle as the South has seen in many years. Expected by many to lose, Georgia Tech furnished the spectators with a real thrill by scoring two touchdowns in the second period with well executed forward passing, a department in which that team had shown nothing more than mediocrity so far this year. more than mediocrity so far this year. At the same time Georgia's running attack was being stopped through fine defensive work of Georgia Tech's ends

and tackles.

The superiority of Teeh's rush line during the first two periods at the same time made Georgia's passing attack futile because proper protection was difficult. The feature of the first was difficult. The feature of the first half was a 100-yard punt by Parham of Georgia Tech, the ball being kicked from behind his own goal line into teuchback. During the second half Georgia's passing and running attack got under way and the 14-to-13 victory for Georgia was accepted as the margin of superiority. Capt. M. H. Morton '27 of the victorious team proved himself to be an outstanding back. himself to be an outstanding back, probably one of the most effective halfbacks in this region this year.

Alabama Wins Seventh Game University of Alabama continued its victorious march, marking up its seventh Conference victory at the exseventh Gonference victory at the expense of University of Florida by a 48-to-0 acore. Florida was expected to prove easy for Alabama, but its ability with passes was figured to be better than the results show. Alabama showed extreme cleverness in defending against passes, as practically all of Florida's offensive work consisted of passes. The final game of the year for Alabama is against University of Georgia on Thanksgiving Day and indications point to another great game. Universites of Virginia and Mary-

land played a 6-to-6 tie game, though the work of Virginia outshone that of its opponents. A blocked kick led to Virginia's touchdown, but several other threats were turned back, and only superb defensive work on the part of Maryland prevented other Virginia scores. Capt. C. M. Mackall of Virginia again led the defensive work for his team with stellar individual play. Virginia Military Institute won a close game from Kentucky, the winning touchdown being scored in the final minutes of a hard-fought game, and a subsequent successful try for final minutes of a hard-fought game, and a subsequent successful try for point bringing a 10-to-9 victory out of an apparent defeat. Virginia Polytechnic Institute met with a second consecutive Conference defeat after going undefeated until a week ago. Washington and Lee's line attack was too strong for Virginia Polytechnic and resulted in two touchdowns for a 13-to-0 victory.

University of North Carolina lost an important state game to Davidson

important state game to Davidson College, 10 to 0. Before this game North Carolina had shown steady improvement and hopeful signs for a successful end of a hitherto disastrous season were seen. Another equally important game in the State of North Carolina was the North Carolina State-Duke University game, the former team winning 26 to 19. McDowell of North Carolina State, one of the best all-round athletes in the Southern Conference, featured the game with three touchdowns, one an 85-yard run back of a punt. North Carolina faces Virginia on Thanksgiving Day in a traditional struggle, perhaps the most colorful and interesting game in the northern half of the Conference each year.

South Carolina Loses to Furman
University of South Carolina was
eliminated as a possible champion of
its state by losing to Furman, 10 to 7.
Furman University, one of the leading
members of the S. I. A. A., now has
three victories over Southern Conference teams, its victims being North
Carolina State, University of Georgia,
and South Carolina, with fine prospects of adding Clemson College, a
Conference member, to this list on
Thanksgiving Day. Clemson dropped
another state game this week, the
Citadel team winning 15 to 6. The
state championship, one of the hardest
fought for honors in the South, will
be decided this week-end between Furman and the Citadel, both S. I. A. A.
members, with chances favoring the

man and the Chadel, both S. I. A. A. members, with chances favoring the former.

Alabama Polytechnical Institute lost a 19-to-3 verdict to Marquette University from Milwaukee in an interesting game in Birmingham, Ala. Marquette's scoring was all done in the final quarter with Alabama Polytech leading 3 to 0. Halfback O'Keefe of the visitors impressed Southern fans with brilliant work, both in running with the ball and in accurate throwing of deceptive running passes.

Louisiana State won a 3-to-0 victory over University of Mississippi in a game that indicated marked improvement of Louisiana in all departments of the game. Continued improvement will give this team a fine chance to win its big game of the year from Tulane on Thanksgiving Day. Tulane won a 19-to-7 victory over Sewanee. Mississippi A. & M. lost an intersectional contest to Indiana University. 19 to 6. apparently inability to cope with Indiana's passes being the deciding element.

Nearly ali the Conference teams

ave open dates on next Saturday in reparation for important games on hanksgiving Day. Four teams, how-

North Carolina State in Columbia.

Cross-Coustry Championships

During this opan week interest in centered in the annual cross-country championships, to be held on the campus of the University of Georgia at Athens. The race is over a distance of five miles: Last, year the championship honors were divided between Georgia Tech and Virginia Foly. It the team race resulting in a tie. These two teams again seem to have the best chances of winning with Georgia freely the teams again seem to have the best chances of winning with Georgia freely teams agains seem to have the best chances of winning with Georgia freely team for completition against a large field than in dual meets, while the universities of Maryland, Virginia and North Carolina all claims atrong teams. Elliot of North Carolina, Conference mile winner last year in the time of 4m. 251-5s., should be up well among the earlier finishers. With a large field of entries certain to participate, all of the teams mentioned are possible winners.

Conference teams to enter the meet are Maryland, Virginia, Washington and Lee, Virginia Poly, North Carolina, Conference teams to enter the graph of the world championship tournament and the title will meet fornight in the closing match of the tournament and the title will meet tonight in the closing match of the tournament and the title will meet tonight in the closing match of the tournament and the title will meet tonight in the closing match of the tournament and the title will meet tonight in the closing match of the tournament and the title will meet tonight in the closing match from Pasquale Natalie of Baltimore, 125 to 8.

Cross-Country is making rapid strides in the Conference toward great popularity. Immediately preceding the race University of Georgia will show its visitors the amount of interest that rowards and the proposition of the conference toward great popularity. Immediately preceding the race University of Georgia will be went and entries for a world a half-mile run.

BENSON OF ENGLAND

IS DOUBLE WINNER

By Wireless from Monitor Buress
LONDON, Nov. 17—A brilliant little
paragraph was written in wrestling
history here yesterday evening at the
Stadium Club, when V. A. Benson of
the London Amateur Wrestling Society won both middleweight championships of England, catch-as-catchcan style and that of 10½ stone (147pound) class under Cumberland-Westmoreland rules. In the latter, which
was contested first, he won all his six
bouts, with neatness of dispatch, but
in the more expansive variety of the
game he had hard work to gain a
second faff over B. M. Bayley, a wiry
member of the Stadium Amateur
Wrestling Club, who kept his more
experienced opponent hard at it for
seven minutes.

experienced opponent hard at it for seven minutes.

The sport of wrestling has been in rather a dormant state for many years now mainly because it does not lend itself to spectacular presentation, but a representative of The Christian Science Monitor was informed yesterday evening by Percy Longhurst, honorary secretary of the National Amateur Wrestling Association, that it shows distinct signs of coming into its own very soon—in time possibly for the Olympic Games at Amsterdam in 1928.

### GERMANY LOOMS AS A STRONG CONTENDER

U. S. Must Show Up Better to Retain Olympic Title

WASHINGTON, D. C., Nov. 17 (49)—Germany is the nation which the United States must beat if it is to retain Olympic track and field supremacy, in the opinion of Lawson M. Robertson, University of Pennsylvania coach, here to attend the quadrennial meeting of the American Olympic Association. Robertson was the head coach of the last American Olympic team.

team.

"Germany," said Robertson, who visited that country this summer, "has 3500 athletic ciubs, 5000 athletes in training and a big coaching school as evidence of its remarkable sports revival. They have four sprinters who are the equal of any quartat in this country now, and the greatest runner in the world in Dr. Otto Peltzer, who has broken J. E. Meredith's half-mile record and beaten Paavo Nurmi, Edwin Wide and others.

"The Germans are making extensive preparations for their return to the Olympics and figure on being second to the United States in track sports.

Olympics and figure on being second to the United States in track sports. I believe they will be our foremost opponents, stronger than Finland, which was second the last time."

Prospects of a conflict in shaping the 1928 Olympic plans yesterday greeted representatives of most of the Nation's sports governing bodies who gathered for the quadrennial meeting to frame this country's program of participation in the international games at Amsterdam two years hence. Preliminary discussions revealed delegates divided apparently into two camps, one representing the viewpoint of the Amateur Athletic Union and Intercollegiate A. A. A. A. present controlling factors, and the other represented by the National Collegiate A. A. A., Y. M. C. A., and National Amateur Athletic Federation.

Differences between some of these rival organizations date back over a period of several years in matters of athletic policy. The A. A. U. and N. C. A. A. particularly have been at odds over such issues as controlling foreign, competition by American track and field athletes.

competition by American track and

competition by American track and field athletes.

The first conflict over reorganization of the association resulted in defeat of a proposal by the Amateur Athletic Union to unseat 12 voting representatives appointed by the President of the United States The issue arose in connection with consideration of constitutional amendments. By a votegof 35 to 32 it was decided to retain the delegates representing the 12 Federal Reserve districts. Officers of the National Colorists A A and its allied groups led

legiate A. A. and its allied groups led the debate in support of these representatives and in opposition to the proposal of the A. A. U.

Col. Robert M. Thompson, veteran president of the association, sent word that he would not be able to accept another term as head of the actual working Olympic committee. He held this office in 1912 and 1924. Julius H. Barnes of Minneapolis, also notified the association he would be unable to continue as treasurer. legiate A. A. and its allied groups led

TO INVADE SOUTH AMERICA

Special from Monitor Buresu
CHICAGO, Nov. 17—Jacob Schaefer of
this city, former world's champion at 18.1
and 18.2 balkline billiards, starts an invasion of South America. He sailed Monday from San Francisco, where he spent
the summer. Schaefer will devote a
month to six weeks to matches on the
southern continent. This is the first visit
ever undertaken of South America by
one of the great billiard stars. While the
game of ivory and green cloth in its
three-cushion and pocket varieties has
been popular for many years below the
equator, it is only in the last few
years that the balkline game at which
Schaefer stars has been taken up.

### **EDITORIALS**

While it might be assumed that the proposal made by President Coolidge to refund a part of the federal income tax

Who Would Benefit by the Tax Refund?

levied during the present year on earnings reported for the year 1925 would be welcomed without protest or demur, it appears that economists are prepared to interpose serious doubts as

to the soundness of the plan. The mere fact that the sum collected is somewhat larger than preliminary estimates indicated, and that as a result a surplus has been accumulated, seems not to be regarded as justification for turning back to the sources of origin one-tenth or oneeighth of the total.

At first blush it might appear that such a uniform refunding plan would afford exactly the solution sought. It might be unanimously agreed that those who have paid in excess of the national needs should be made the primary beneficiaries of such a redistribution. But there at once appears what may be regarded as an important counterbalancing consideration. It was immediately made 'clear when the President's plan was announced that the great industrial corporations, having been the largest taxpayers, would, of course, receive the largest share of the refund. It would be a simple mathematical undertaking to compute the amounts to be refunded on the basis of taxes actually paid.

But the element of apparent inequality enters when it is realized that the taxes paid by efficiently organized producing industries are charged back by the corporations or individuals operating them as an item of overhead cost, just as in the case of state and municipal taxes assessed against the tangible properties involved. The item is a perfectly proper one, no doubt. It being admitted that by this more or less direct method the total of federal taxes paid is reflected just as directly and just as unfailingly in the cost of production which is adopted as the basis upon which the market or selling price of the commodities produced is fixed, the consumers have already paid, or eventually will pay, the tax levied upon the producer.

Argument might be presented to convince anyone of the unfairness of any plan which would reimburse the larger taxpayers if they already have written off the tax expense by charging it to the ultimate consumer. The amounts which would be refunded to the average wage earner or salaried employee would not be large in comparison to those which the industrial corporations and their participating stockholders would receive. If it can be satisfactorily established, therefore, that the chief beneficiaries under the proposed plan are not fairly entitled to the relief which would be afforded, it may be the more readily understood why the proposal has not been hailed with the applause usually accorded tax reform.

It must be agreed that any acceptable plan for the reduction of the federal tax burden should assure complete equality in the benefits provided. If it is ascertained that the rates now fixed will return a surplus even under less favorable economic conditions than now prevail, a comprehensive revision of the schedules should be undertaken. No one would pretend to argue, of course, that any refund made to industrial reflected in future cost sheets or selling prices. But it may be assumed that reductions made in taxes hereafter to be paid would, in the natural course of events, be more or less equably distributed for the benefit of the consumers.

Hence those among the members of the President's own party who are not in accord with him in the matter of the proposed refund find it possible to defend their position upon the ground that it is wise, until it is shown that the annual surplus from income taxes is more or less unvarying, to devote it, in the meantime, to the reduction of the national debt.

An example of the curious cross-currents in American politics that influence the decision of

the voters was manifested in the recent An gubernatorial contest in the State of New York. Unwarranted The unsuccessful candi-Charge date endeavored to give of Socialism prominence, as issues of the campaign, to the

charges: First, that his opponent had failed to investigate conditions affecting the milk supply of New York City; and secondly, that the plan for water-power development favored by Governor Smith was "Socialistic." As to the immediate necessity for action to bring into use the great natural forces of rivers now unharnessed, there was no dispute.

It is conceded that the public welfare will be promoted by the largest possible utilization of these forces, but there is a pronounced difference of opinion as to the method by which the development should be undertaken. As against Governor Smith's proposals for state construction of dams and plants, to be leased for operation by private enterprise, the Republican candidate urged the leasing of the power sites by the State to operating companies, leaving to the latter all expenditures for construction. Which of these methods will best serve the public's interests is a matter that only practical experience can determine, and the issue raised would hardly seem to be one that can be settled by applying the word "Socialism" to the plan for state aid in the initial stages of development.

That despite the charge of "Socialism" Governor Smith was re-elected by a large majority, by no means indicates that any considerable number of the New York voters favor Socialistic theories of government. Most of those who allowed the issue to influence their vote in favor of the Democratic candidate would doubtless vigorously deny that they are Socialists. They might recall that the great development of the American transcontinental railways was made possible by large grants of government money d lands in aid of the construction of the roads, wing their operation in the hands of private mnanies.

The coming of electricity has created new problems that should be discussed on their

merits without bringing in irrelevant charges of favoring un-American policies. Probably nowhere on the globe can be found a population less inclined to Socialism than that of the Canadian Province of Ontario, yet the development there of electric power under government auspices has been highly successful. There is no danger that New York State will become socialistic because of aid given to a muchneeded public improvement.

The results of the recent elections to the House of Representatives are interesting from

'The House of Representatives Shall Choose'

several different angles. The loss of Republican seats was less, proportionately, than in the case of United States senators. Notable victories were gained by the dry forces, and 70 per cent of the repre-

sentatives are strongly in favor of maintaining and enforcing the Eighteenth Amendment. From another aspect, however, the elections are significant, for the Republicans have a safe majority of the state delegations in the House of Representatives. It is conceivable that this may be of some importance in the presidential election of 1928.

In the event that the electoral college does not give a majority to a presidential candidate— that is, if the votes are distributed among three candidates-the Constitution provides that the House of Representatives shall choose the President by ballot; that the vote shall be taken by states, with each state having one vote, and that a majority of all the states shall be necessary to a choice. In 1924 there was considerable speculation as to what would happen were the three-party contest of that year to throw the election into the House of Representatives. The delegations of Montana, Nebraska, New Hampshire and New Jersey were evenly divided between the parties. There was a likelihood of a tie in Maryland also, and it was possible that Wisconsin and North Dakota might be disposed to vote for La Follette. In the House of the Sixty-eighth Congress, therefore, there were only twenty-one or twenty-two state delegations controlled by Republicans, and the Constitution provides that a majority of the states is necessary for a choice.

No such possibility will exist in 1928. The Republicans have majorities of twenty-seven state delegations. The Democrats have nineteen. Two state delegations are evenly divided. The verdict of the House of Representatives will therefore be known in advance. The House elected in 1926 would determine the result of the presidential election in 1928, although in the latter year a new House would have been chosen. This is one of the provisions of the Constitution which would be changed by the adoption of the so-called Norris Amendment to the Constitution, changing the dates of congressional sessions and the Inauguration Day. A resolution proposing such an amendment to the Constitution has passed the Senate three times, but the House has as yet declined to act. It is worthy of note also that the new House of Representatives is apportioned on the basis of the 1910 census. Apportionment on the 1920 census would not affect the lineup of state delegations, so great is the Republican primacy. It might, however, affect the composition of the electoral college, but this in 1928 will be deternined as of 1910, because action by at the coming session is extremely improbable.

While it is the accepted theory of every democratic government that there should be assured

Compulsory Voting: A Means to an End

to those governed the right of free decision as to how and by whom they shall be governed, it is not quite clear whether it is absolutely safe to leave to the same people the privilege of determining for them-

selves the question as to the necessity of expressing their choice and preference. It is because of this undetermined policy that it is frequently proposed either to penalize those who fail or refuse to vote, or, if the effort be to attain an equally representative expression of opinion, to reward, in some form, those who thoughtfully and habitually exercise the right of suffrage.

Before it would be possible to agree upon either of the proposed expedients and to prescribe the measure of punishment to be imposed in case of failure or refusal to vote, or to fix the value or nature of the reward of merit bestowed upon the men and women who do vote, steps should be taken to ascertain why it is that even in general elections in the United States only one-half of the qualified voters, approximately speaking, go to the polls. It would be vain to ascribe this negligent attitude to the belief held by non-voters that they will be misgoverned in any event. That, in effect, is often the plea of the men and women who seek to excuse what, to their more patriotic neighbors, appears remissness. But that is a specious and flimsy plea at best. They are not misgoverned. Perhaps it would be unfair to intimate that possibly they are better governed than they deserve to be, considering their own refusal to express before election as emphatic a choice as they sometimes seek to indicate after the votes are counted.

It would be interesting if it might be shown more or less conclusively whether the states and the Nation would be better governed and their affairs more wisely directed if all able to qualify as voters took advantage of their opportunity. Presupposing a condition under which all voted voluntarily, or under which it was possible to induce, by fear of punishment or by promise of reward, all recalcitrant voters to express their choice, one might wonder if the tendency might not be toward a withdrawal of delegated powers, now generously and wisely provided for, and a simultaneous assertion of individualism, which now finds expression in the reclaimed right to initiate laws and to repeal them by referendum vote.

Of course, there are those who contend that closer approach to what they declare to be "pure democracy" marks a progressive stage in the expression of truly democratic ideals. But

against this insistence it must be conceded that no fair test of such processes can be made possible until the expression of the popular choice at the polls approximates that of a representative number of those entitled to vote.

While theoretically it is admitted that every citizen should exercise the right of choice in the selection of public officials, thereby assuring a more representative if not actually a better government, it cannot be as generously conceded that the citizen who has habitually refrained from voting, thereby hoping to escape the possibility of doing duty as a juror and the certainty of being assessed for poll taxes, would bring to the polls just the wisdom or patriotism needed to raise the level of excellence in the

The ancient attitude of contempt for inhabitants of rural regions, affected by dwellers

Signs

of Progress

in Vermont

in cities, has not been lacking in the United States, although it is less excusable there than elsewhere, because that Nation's rapidly growing big towns have been made very largely by people born in "the

country." On this account, assumption of urban superiority in America is a reflection by great numbers of city folk on their own origin, and expresses contempt not only for "country cousins" in general, but also for actual brothers, sisters, fathers and mothers.

A phase of this "city" attitude is the singling out of particular regions for habitual criticism and ridicule. An American state that has been the object of such unfavorable comment is Vermont. But of late that State has been making noticeable strides forward in the march of progress. Indications of this have been many and varied. Evidences of advancement given recently in two important directions furnish ground for justifiable pride on the part of Vermonters and gratification to the hosts of outsiders who cherish a warm affection for the State. Striking testimony is given to the development in the last few years of the State's educational facilities and its forests.

Dr. A. E. Winship of Boston, editor of the New England Journal of Education, who has made a close study of the Nation's schools for forty years, recently made a tour of Vermont for special examination of its educational conditions. After his survey he declared, in an address at the state capital, that he was convinced that Vermont had made more progress in educational improvement, and particularly in its rural schools, than any other state in the country. Coming from so competent and distinterested an authority, this testimony is specially valuable. As the population of Vermont is so largely rural, there being few towns of considerable size in the State, evidence of great progress in its country schools is particularly grati-fying. It means much for the future of the commonwealth.

Figures recently given by the Vermont forestry service show how great the advance in the development of the woods of the State has been. They indicate clearly that the people realize that mistakes have been made in the past and are determined that every effort to correct them shall be made in the present and future.

As to private plantings of trees: In 1907, there were 35,000 seedlings set out. In 1914, the total was 869,000. The war was a temporary setback, but a surprising jump followed the armistice, and in 1925 the private plantings reached 1,335,000 trees. This year the total has been 1,740,785. Town forests and plantings to protect watersheds have made substantial progress. Rutland city, with 1800 acres of protected watershed and 416,000 trees, leads the State, but other towns are moving. Essex Junction has bought and planted 700 acres with 240,000 state trees. On Montpelier's 800 acres over 150,000 trees have been planted. And so it goes throughout the Green Mountains.

Striking progress has also been shown in other directions in recent years-in agriculture, in the development of water power, in the establishment of varied industries and in the summer resort business. The pastime of casting slurs on Vermont is losing its point, for it will soon simply expose ignorance of facts on the part of those who indulge in it.

### Random Ramblings

Senator Reed criticizes President Coolidge's advocacy of the conscription of capital equally with men in the event of war, on the ground that dollars would hustle into hiding and thereby make the carrying on of war impossible. That's just it. Looks as if the Senator was "hoist with his own petard."

A tourist complains that such a prosaic thing as an ice card should be hanging on the gate post of the President's home in Northampton. "Keeping Cool with Coolidge" apparently begins in the home.

The new "rubber plating" process is said to promise a revolution in the rubber industry. That, however, is an old story, for revolution in the rubber industry started years ago with rubber tires.

That 130-pound army recruit who can tear three packs of cards in half ought to have little difficulty

Though the rowing season is over at most colleges, they are still doing a lot of punting on the football field.

A good way to help ease the world's burdens is not to load up the ash can too heavily for the faithful The first taste of snow shoveling is not usually

followed by a request for a second helping.

Now come the days when some of the daylight saved in the summer would come in handy.

At last the perfect family motorcar has appeared. It has two steering wheels and dual control. Plant tulips now that they may be ready in the spring to kiss the May sunshine.

A club that exerts a strong influence at this time of year is the Christmas Club.

The season's best cellar-the one filled with coal.

The Inherent Charm of Paris

YES, Paris is charming. There is a thrill in the very name. What most fascinates me in Paris, however, is the great outdoor, living motion picture of people. Nowhere else, not even in Cairo, Constantinople, Naples, nor London itself, have I been so interested in the multifarious and multicolored tide of humanity.

Why they seem different is difficult to explain. Possibly

it is because the people are so individual, or because of the unexpected. You dare not hazard what you will see a person in the act of doing next. But come with me for a leisurely drive, and I will give you some concrete exam-

There is nothing like the old horse-drawn open carriage from which to see Paris. True, there are not many of them now, alas! But it is possible to find an occasional one idling near the Madeleine or the Place Vendôme—a relic and a welcome reminder of more leisurely times. There is something fascinating about the old dilapidated vehicle itself; something rather pitiful and touching about its last lame but courageous efforts to look respectable and inviting now that its days of prosperity are past.

The old cocher—genial fellow—still clinging tenaciously to his time-worn tall hat, takes care, as of old, to smooth

out and fold his tattered coat and to lay it on the box as if it had come from the tailor's but today. Yes, the veteran fiacre can give you a ride such as no taxi can confer: a pleasant, airy, leisurely jog-trot, which enables you to see what is going on about you—and to think.

There is no vague impression of trees whicking by, of

scores of pedestrians seeming to fly in the opposite direction. Everything around you, as you pass along "in state," as it were, is just natural. The passers-by approach, linger in view a few seconds, and disappear; but not until you have had time to scrutinize them and deduce what manner of folk they are-at least the most interesting and

One cannot go far in Paris without giving way to the inclination to venture a guess at the nationality of this or that person. It's an interesting game, whose only drawback is that the opportunity to verify one's observations and conclusions scarcely ever arises.

For instance, take that party strolling down under the trees—the middle-aged gentleman and the two young women, evidently his daughters. They might be French, for they are smartly dressed and well groomed, and seem quite at home in their surroundings; yet you feel convinced they are not! It is hard to say exactly why. But surely the younger pair have that easy, strolling yet firm gait which seems to characterize the Anglo-Saxons, in contrast to the rather mincing, short-stepped, dainty walk of their French sisters. And the gentleman? Well, his face betrays him! But at that, it is not easy to be too sure of oneself.

The folk seem to go about mostly in two and threes, chatting gayly for the most part; others-visitors, probably-look wistfully and curiously about them. But the picture is changing all the time. . . Look at that lady with the tiny dog that has broken loose and is making impish circles round and round her, dragging behind it the fancy leather leash. .

With her head bent down in fruitless persuasion, Madame nearly collides with the grave, bearded Monsieur coming in the opposite direction. A profusive exchange of "pardons" (with that well-rounded "r" which we for-

eigners find it so hard to acquire), and Monsieur passes on his stately way, carefully replacing his silk hat. An altagether impeccable, immaculate gentleman, he has evidently "arrived"—and is quite conscious of it!

And now we come to the other end of life's scale, the Paris children. Look at this happy little band at play; dainty creatures, all chubby legs and laughter, prattling away as they fling their ball to and fro on the wide sidewalk, beneath the trees.

How charming to stop and listen for a life of the life of the listen for a life of the listen for a life.

How charming to stop and listen for a while to their delicate young accents, to the soft French that trips so lightly from their lips; and to reflect ironically on the laborious hours that we foreigners have spent in trying to master their tongue! Surely there are no students of a nation's language so apt as those who do not even realize that they are learning it—the children.

Their nurses, too, are always a source of interest to the visitor, for it is obvious that they are not, as a rule, Paris-born women. Their quaintly shaped black or white headdress, their clear complexions speak indubitably of Brittany or Normandy, while here and there one sees the dusky features that tell of southern origin, of Provence or the Mediterranean coast.

And speaking of children and their guardians, one inevitably recalls and compares these of Paris with their counterparts that haunt the shores of the Round Pond in Kensington Gardens, and Central Park in New York. All the world over, they fascinate us; no racial prejudices among the children; no international debts and doubts among the countless playmates of Peter Pan; just a common seeking after happiness. If only the nations could mon seeking after happiness. If only the nations could emulate them and their ways!

But to pass on, for there is always something fresh to notice. Look at this couple on the refuge, balancing themselves, as it were, in a furtive effort to cross the road. It is quite a problem, this street crossing in Paris, for the traffic moves faster than in either London or New York. The Parisians have made it a fine art, and the maneuvering of the traffic is accomplished with remarkable

And then there are the more lonely, the isolated frequenters of this ever-changing but changeless stage. Look at that fellow sprawling languidly on the wooden seat, his newspaper fallen from his hand. Large-rimmed hat and profuse black tie: he may be an artist from the Latin quarter—or just somebody who wishes he were one. At any rate, he has evidently become tired of making pencil or mental notes, such as we are doing, and has drifted into the land of dreams.

But here's another contrast. Observe that bronzed, strong-looking man on the next seat, with a mackintosh beside him. He's obviously an Englishman, even if a glance at his brogues did not give him away. Probably spending a few days in Paris on his return from some walking tour in the south. Everyone comes to the Bois to see the daily pageant.

And all the time the bell on our horse's collar con-

tinues its somnolent tinkling. I like that bell; it is so soothing. Sometimes of an evening when my wife and I take a drive like this, it almost lulls us into drowsiness, if not to slumber. But we must turn round and wend our way back. . . . Paris is indeed fascinating.

### The World's Great Capitals: The Week in Berlin

DERLIN is about to receive a new attraction, namely, an artificial hill, which will be erected on the fair grounds in the west of the city, where the wireless mast carrying a restaurant located fifty meters above the ground already has become a center of interest. The new hill will be made of the earth and sand excavated in the course of relaying the tracks of the big Charlottenburg station. It will have a height of eighty meters, thus surpassing the hitherto highest "mountain" of Berlin, the Kreuzberg, by sixteen meters. In the winter its slopes will be converted into a huge run, adding much to the enjoyment of the boys and girls of all ages. Another interesting feature of this city now under construction will besix covered tennis courts, to be opened in one of the side streets of the Kurfuerstendamm Boulevard. They will be the first of their kind here, and tennis players are happy that they will be enabled to continue their sport through the winter months.

The B. Z. am Mittag, one of Berlin's most popular papers, is now publishing short lists of notable passengers leaving for the United States on the big German ships, being the first paper to introduce this custom successfully in this country. Among the names of the last list was that of Mrs. James Walker, the wife of the Mayor of New York, who had come to Germany at the invitation of the Hamburg American Line to christen its latest ship, the New York. She was much fêted during her stay here, and was even received by President von Hindenburg. Mrs. Walker took the hearts of the Berliners by storm when she spoke kind words about their city, lauding especially the cleanliness of its streets. In return they were much interested in what she had to say about American women and their co-operation with men. + + +

The Zeppelin works are busy building a new giant airship for a service between Spain and Argentina which will have a length of 250 meters, a breadth of thirty-one meters and a height of thirty-five meters. Since this ship is to be used primarily for passenger service, the captain's gondola and the passenger cabin will be separated from one another. In the Los Angeles (ZR III), it will be remembered, they were in one. The ship will have seven engines, each in a gondola of its own. Work on the hull will be commenced in about five weeks, while the first trial flights are expected to take place in a year. The lighter-than-air people, however, will have to get busy if they wish to catch up with the heavier-than-air pilots. Not less than six pilots of the German Luft Hansa (air traffic company) here have now flown more than 300,000 kilometers each in the course of the daily service. Each of them, therefore, has encircled the globe, in theory, almost

Of the 1143 schools in Prussia in existence last year, 358 have the names of prominent persons, and of this number almost half, namely, 136, are called after members of the house of Hohenzollern, according to a statement recently made by a Republican. Twenty-five schools bear the name of either Emperor William I or Emperor William II: twenty-three that of Queen Luise; nineteen that of Kaiserin Augusta Victoria: sixteen that of Emperor Frederick; twelve of King William, and seven that of the former Crown Princess Cecilie. Only forty-nine schools, he continued, are named after poets, whereby it is interesting to note that Friedrich von Schiller with twelve schools is given preference to Goethe with only ten schools, perhaps because his dramas, "Jean d'Arc and the "Robbers," appeal to the pupils more than Goethe's "Faust," while his famous poem, "The Bell," is known to every German schoolboy for its length. One school is called after Gerhard Hauptmann, one of

Germany's most prominent living playwrights. Ten schools have the name of Bismarck. There surely would have been more, the compiler added, had the Kaiser not disliked him. Two, it is interesting to note, are named after Walter Rathenau, one of the most distinguished Foreign Ministers of the young German Republic, who was assas-sinated some years ago. One school located in the Baltic port of Swienemuende is called after Admiral von Tirpitz, the advocate of the submarine war. While ten schools,

moreover, are named after von Hindenburg, not one is named after General Ludendorff. Only two honor Martin Luther by bearing his name. Since the revolution, it is interesting to note, 105 new schools were opened in

+ + The announcement by the Ministry of Posts that the ten-pfennig stamp of the new issue bearing the heads of prominent German composers, poets and philosophers will show the head of Frederick the Great, has led to no little controversy here. First of all, Bavaria protested against this outburst of "Prussianism." The head of one of the most Prussian kings that ever lived should not adorn a stamp of the Reich, they say, and they ask whether the Prussians would like a stamp with the head of a Bavarian king. The Republicans, too, got busy, scenting a new form of monarchistic propaganda at the back of this affair. The head of a monarch does not belong on a stamp of the Republic, they aver, and furthermore they point out that it is the ten-pfennig stamp which is used most in Germany that is selected to display his head. Thus, should the new stamp be issued according to the original plan, it may happen that true Bavarians and true Republicans will avoid using the monarchistic stamp, preferring to make use of two five-pfennig stamps instead with the impress of the poet Schiller, while monarchists may be tempted to increase the volume of their mail in order to use as many Frederick the Great stamps as

+ + + Dr. Peltzer, one of Germany's best light athletes, who won one of the events in the British championships and defeated Nurmi and Wide over the distance of 1500 meters, is a strong supporter of prohibition, according to a Berlin newspaper.

### The 48-Hour Week Law Controversy

To the Editor of THE CHRISTIAN SCIENCE MONITOR:

Your recent story, commenting upon the hearing on the proposed forty-eight-hour week law for women before the New York State Industrial Survey Commission, gave the impression that the point involved is a shorter workday for all workers. There is no difference of opinion, so far as one can see,

with regard to the desirability of a shorter workday for all workers, but the statement of one of the proponents of the forty-eight-hour law for women, concerning the advantage of a forty-four-hour week for all workers, both men and women, in her factory, through voluntary agreement between the employer and her employees, and not prohibiting overtime, had nothing whatever to do with the controversial issue before the commission, i e., whether there shall be a forty-eight-hour law applying to women only, and forbidding them to work overtime in case of necessity or emergency.

The Woman's Party claims that labor legislation based upon sex is itself a denial of the equality of men and women before the law; that to restrict by law the hours of labor of women but not those of men perpetuates the idea that women are a class apart in industry, who are only allowed to work at special hours, under special supervision and subject to special governmental regulations, and deepens the impression that women are essentially inferior as economic units.

The passage of the proposed forty-eight-hour measure for women only would, we believe, undermine women's chance for industrial equality with men. The woman worker's scope of activity would be restricted. She would have less opportunities in securing employment, because the hours she could offer her employer would be fewer than those which the man could offer. She would not receive equal pay with the man worker, because the hours of

service would be unequal. JANE NORMAN SMITH, New York State Chairman, National Woman's Party.

New York, N. Y.
